

CL500KEY Mechanical Lock

Introducing the CL500KEY

The Next Evolution in Mechanical Digital Access Control.

The CL500KEY brings a powerful update to our trusted CL500 Mechanical Range. The redesigned lever handle assembly offers enhanced durability for high traffic applications, along with the functionality of key override. This solution bridges the gap between the trusted CL500 range and the heavyweight CL600 range, combining robust everyday dependability the CL500 is well known for, and better management versatility with the addition of the key.

Flexible Access with Key Override

The CL500KEY offers improved versatility, allowing you to manage entry with a code, code-free operation or the override key to suit a wide range of access needs. The addition of a Key Override functionality provides a reliable back up to code access, ideal for scenarios requiring additional control or emergency override. This flexible design makes the CL500KEY an excellent choice for commercial, industrial, and residential applications.

Redesigned Lever Handle

A standout feature, the newly engineered lever handle is tougher and ergonomically superior. Its durability and design improvements make it an excellent choice for heavy-duty use in high-traffic areas.

Non-Handed

Lever handles are easily secured on site to suit the door hand using an M5 grub screw.

Fire Door Compatibility

Certified for installation to 30 minute and 60 minute fire doors when paired with the FireKit pack, ensuring compliance without compromising on ease of access. CE marked on CodeLocks latch and lock combinations.

Convenient Deadbolt Control

Mortice lock models include a deadbolt feature that restricts code users when needed, offering tailored access control. A built-in safety mechanism ensures the inside lever handle can always retract the deadbolt, preventing accidental lock-ins.

Upgrade Existing Installations

Front and back plates are available for use with existing locks, providing an easy, cost-effective upgrade.

Key Features

- Key Override – two keys supplied
- Locks can be supplied 'Keyed Alike'
- Full size lever handles with return to door
- Suitable for wooden doors between 35mm-60mm thick
- Large three coil lever return spring suitable for high traffic use
- Limited lifetime guarantee¹
- 2,047 non-sequential code combinations
- Code Free access option
- Back to Back option
- Suitable for internal and external use
- Compatible with XT2 Weather Cover
- CE marked latch or lock supplied
- CodeLocks FireKit can be fitted to latch and lock for 30 or 60 minute fire doors. Tested in accordance with BS EN 1634-1²

CL500KEY Mechanical Lock

Why Choose the CL500KEY?

The CL500KEY is designed to deliver the ultimate combination of convenience, durability, and reliability. Its heavy-duty construction and full-size lever handles make it suitable as the primary access mechanism on most doors. Whether you're upgrading from the CL500 or looking for an alternative to the CL600, the CL500KEY offers unparalleled ease of use and functionality.

Applications

The CL500KEY is designed for installation to high traffic areas;

- Offices and workplaces
- Schools and universities
- Healthcare facilities
- Warehouses and industrial sites
- Transportation and logistics

The CL500KEY is built to withstand the toughest environments while delivering the flexibility and functionality you need.

Additional Features

Code Free Access

The CL505KEY, CL515KEY and CL525KEY models provide a Code Free option. The outside lever will retract the latch freely until disabled.

Back to Back (BB) Option

Two coded plates for installation on both sides of the door. Provides coded access in both directions.

Split Follower

The CL520KEY and CL525KEY Mortice Lock models utilise a split follower as a safety feature. This enables the inside lever to retract the deadbolt and latchbolt, after the deadbolt has been thrown, to prevent an accidental lock in.

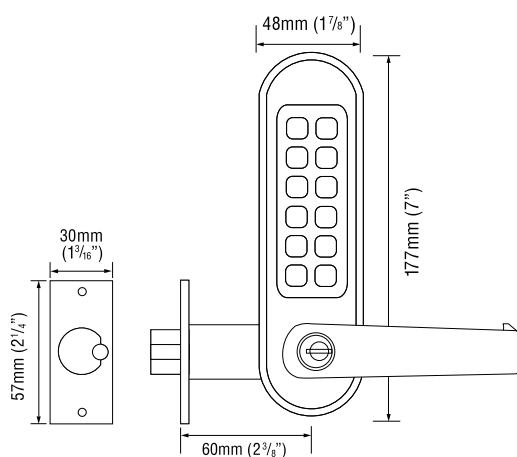

Marine Grade

Selected CL500KEY models are also available in a black, marine grade finish. Salt spray test up to 1000 hours³.

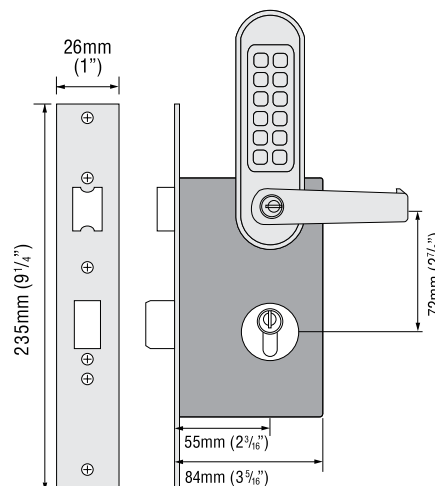

Product Dimensions

CL510KEY/CL515KEY

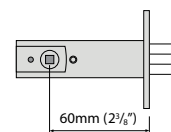

CL520KEY/CL525KEY

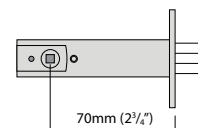

Two Mortice Latch Sizes Available:

Standard Supply

Requires 25mm x 82mm (1" x 3 1/4") hole

Requires 25mm x 92mm (1" x 3 5/8") hole
