

New Key Programming Software Compatible with VOLVO* ADS2334 - Code D756919AD

September 2023

The FIRST TO MARKET solution for programming Volvo* proximity keys via OBD.

What does the software do?

The software programmes slot and proximity keys for a selection of popular Volvo* models like the V60 and XC60. Used together with the new ADA2100 dongle, security data can be read from the vehicle ECU freeing up Smart Pro for other jobs. Replacement keys, both slot and proximity, can then be programmed via OBD. The software bypasses the security pincode and programmes the remote and transponder at the same time. No working key is needed.

What else is needed?

Smart Pro

ADA2100 Volvo Dongle - to free up Smart Pro during the several hours needed to read security data

OFFER DETAILS

Cable	ADC2000
Software category	A
Smart Aerial required	No
Other accessories required	ADA2100 Volvo Dongle

> Full support at mykeyspiro.com under 'Guided Processes'.
