

Kenrick Excalibur Door Lock

A locking solution for residential door security

The Excalibur multipoint door lock system was designed to meet the most rigorous standards for residential door security.

It features three hooks and two steel anti-lift bolts as standard for security. Smooth operation is ensured by three roller cams, one positioned directly underneath the main gearbox.

The three hook lock covers a multitude of options and every lock in the range can be matched with top and bottom shootbolts affording maximum flexibility.

The Excalibur gearbox is sprung as standard for both lever/lever and lever/moving pad options.

Ease of fitting is ensured on all Excalibur locks and keeps by the use of alignment marks.
