## Security Chains

Squire locks are covered by the Squire 10 year guarantee

### New comprehensive range

Squire offer a comprehensive range of chains providing customers with a product for all possible security needs. The chains are all covered in Squire's protective chain sleeve making them easier to handle than non covered chain. They are packed in attractive, yet ergonomic retail packaging making them easy to deal with in store and helping customers choose the security level that best suits their needs.

Squire's TC chain achieves Sold Secure Motorcycle Gold making it an excellent choice for those needing to secure very high value products or in places where high security is paramount.

Squire's G chain achieves Sold Secure Bicycle Gold. With it's 10mm diameter it offers excellent security.

The Squire J chain achieves Sold Secure Bicycle Silver, with it's 8mm diameter it offers excellent security whilst being lighter and easier to carry.

Look out for the Zenith combination integrated lock and chain, with LED feature making the product an excellent choice for those who need security in dark places.

Squire also offer a vast range of lock and chain sets, an intelligently

Bicycle

Sizes are nominal

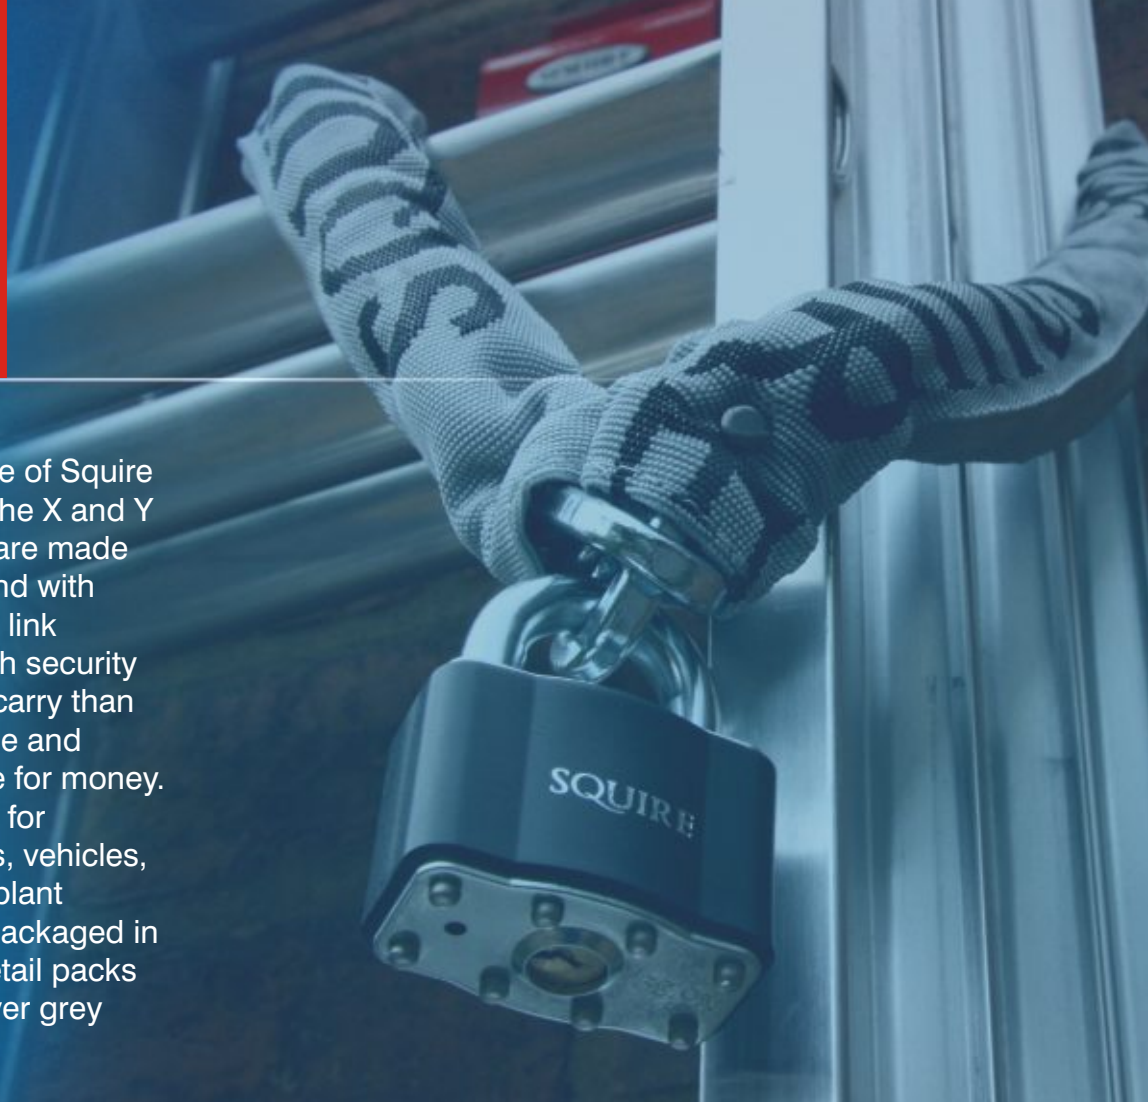

The **Stronghold<sup>®</sup>** range of Squire chains encompasses the TC, G and J ranges. All offer very high security, ideal for locking perimeter gates, substations, heavy goods vehicles etc. These chains would be recommended where there is an increased health and safety risk to the public or employees. Any chain displaying the Sold Secure logo has to undergo extensive and prolonged attack tests. This range achieves Gold and Silver, proving that they are worthy of the respected **Stronghold<sup>®</sup>** name.

®

# SQUIRE

The **Stronglock™** range of Squire chains encompasses the X and Y ranges. These chains are made from hardened steel and with 8mm and 10mm chain link diameter they offer high security whilst being lighter to carry than the **Stronghold™** range and offering excellent value for money. These chains are ideal for securing storage areas, vehicles, motorcycles, site and plant equipment. They are packaged in tidy, easy to display, retail packs and have attractive silver grey sleeving.

 Material: Hardened Steel  
 Chain sleeve: Grey  
 Other features: Square link  
 Model Numbers: 3536C and 3548C

Sizes are nominal

The **Toughlok™** range of Squire chains offers excellent value for money. The chain, like the higher specification Squire chains is hardened, so is still a good choice for securing valuables.

The chain is recommended for securing items within sheds, when combined with a Squire wall or ground anchor. It is also recommended for securing, garden furniture, barbeques, tools, and storage areas. As this chain is lighter than others in the Squire range, it is particularly suitable where the chain needs to be carried, for example if used for locking a bicycle.

## Integrated Lock and Chains Easy and convenient

Integrated lock and chain sets are easy to use and convenient because there is no need to use a separate padlock. There is no compromise on the level of security available, the MAKO™ Conger achieves Sold Secure Bronze, the MAKO™ CN8/900 achieves Sold Secure Silver. The ZR Combi has the added advantage of being a combination lock, meaning 'no keys to lose'. This lock comes with a built in LED making it an ideal choice for people who need to lock up in dark places.

## Integrated Lock and Chains

### MAKO™ CN 8/900

# Lock and Chain Sets

Squire lock and chain sets have been designed to combine chains with padlocks of a similar security level. There are sets to cover all possible uses, from extremely high security Sold Secure Gold locks and chains designed for securing motorcycles and very high value items, to economical mid level security sets ideal for securing

valuables around the home and garden. The **stronghold™** padlocks feature strongly in the lock and chain sets, these are one of Squires best selling high security padlocks, their CEN rating offering added reassurance of their ability to resist attack.
