

One key safe. Multiple properties. No installation.

Managing multiple properties?

Temporary access shouldn't mean buying and installing a new key safe every time.

The **J5 Over the Door Key Safe** can be fitted in seconds with no drilling, screws, tools or specialist installation.

When it's no longer needed, simply remove it and redeploy it at the next property.

Build a reusable pool of key safes rather than continually buying, installing and leaving key boxes behind.

Use It, Move It, Reuse It

Save time
Less travel

Save money
Reusable

No installation
Fewer fixings

Robust & weather resistant

A key safe that keeps working across your property portfolio
