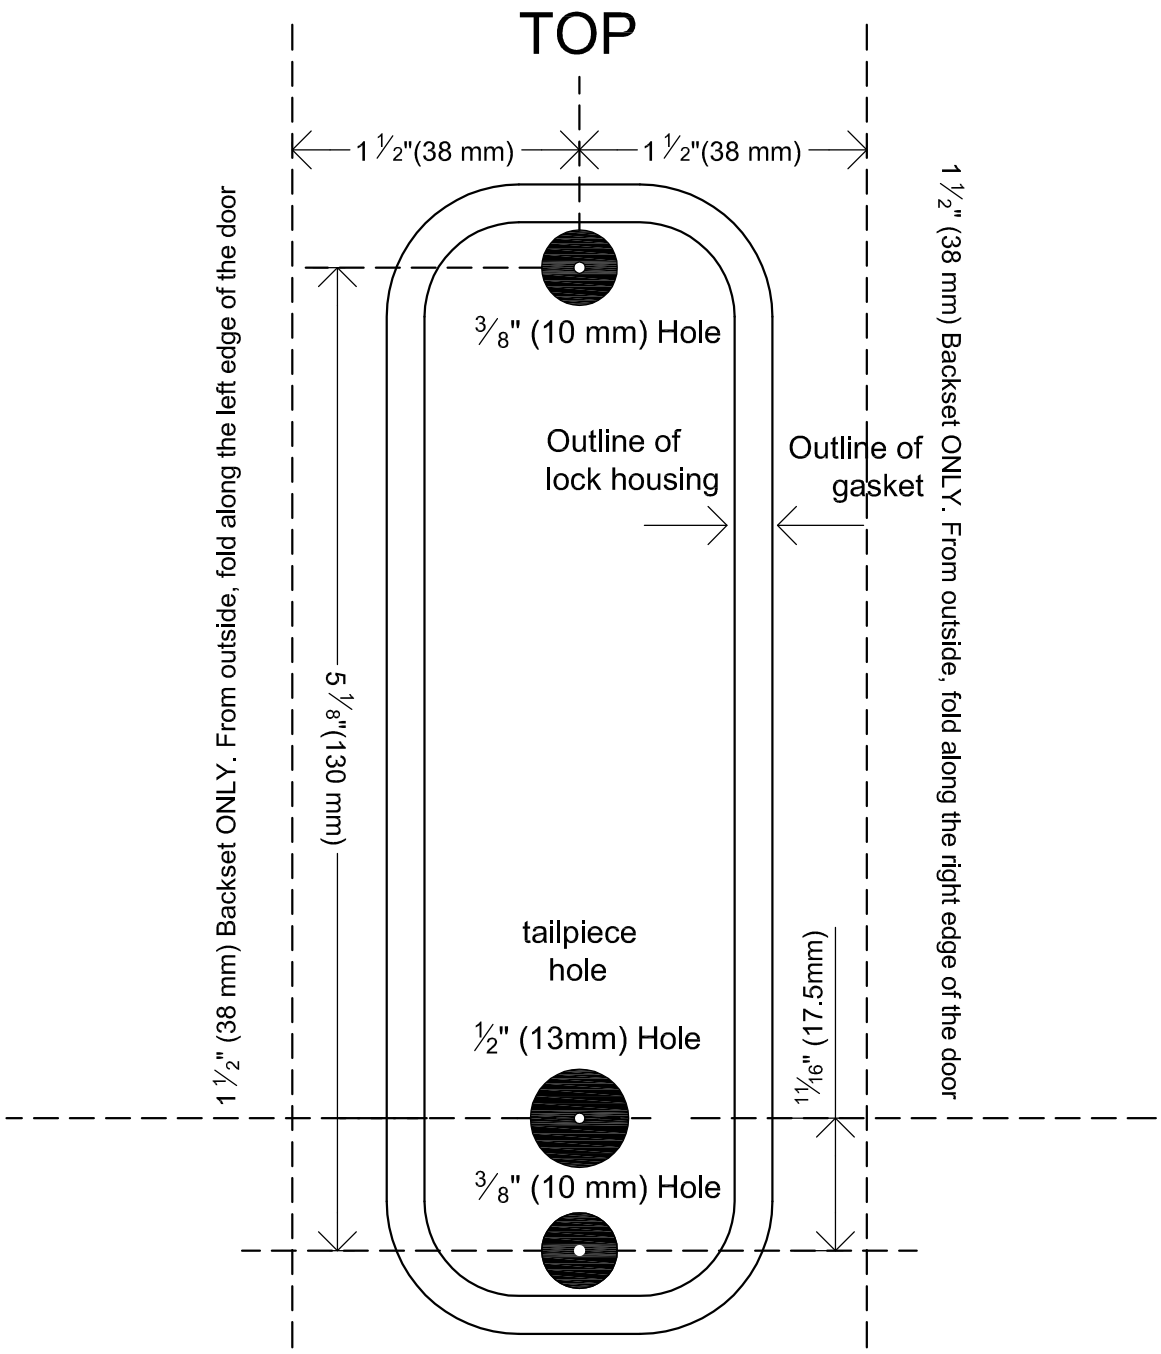
BL4409 TEMPLATE



PLEASE NOTE BEFORE DRILLING

This template is only a guide and prior to drilling, please take into account the gap between the edge of the door/gate and the frame.

Some doors/gates will have a door jamb/gate stop fitted, which would also need to be taken into account as to where the unit is positioned on the door/gate.

The latch fully retracted is 38mm (1 ½") from the edge of the latchbolt to the centre of the knob of the rim fixed latch.
