BUILD THE DREAM...

We have everything you need to build your perfect garden room.

- Measure out and clear a perfectly level space
- Create a level base (concrete or timber joist & filmed chipboard)
- Create your timber frame using stud timbers (CLS or Scant)
- Fix OSB to the timber frame and add a damp proof membrane
- Insulate the garden structure (floor, ceiling & walls)

- Fit doors and windows and roofing to make structure watertight
- Add timber battens to the outside of the structure
- Fit the external cladding
- Finish the outside with decking or paving
- Fit plasterboard and complete internal second fix

UC4 TREATED DECKING JOISTS

C16 & C24 STRUCTURAL GRADED

Use UC4 for all decking sub structure for maximum protection

BUILT TO LAST

The structure that you build to lay your deck on is vitally important to its longevity. Getting the basics right will mean it is strong and stable for years to come.

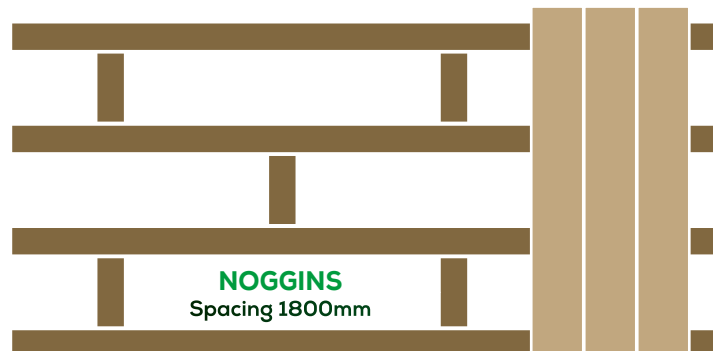

JOISTS
