CURE IT ONE

Cure It ONE is a true single-coat flat roofing system designed to allow for the complete installation of the roof in a single session. Cure It ONE is as a single-application basecoat with no need for an additional layer of topcoat.

Faster multi surface one coat application

Cure It ONE features a unique single coat system without the need for a topcoat. It can be applied and cured in half the time of a traditional GRP installation and is suitable for a range of surfaces without the need for primer.

20 Year Materials Guarantee

Cure It ONE roofing systems come complete with a 20- year guarantee on the materials from the manufacturer.

All seasons

Due to the integrated slow-cure base coat, Cure It ONE is designed for seasonal variations from cold weather application to hot summer installations. GRP warm roof installation), installation is quicker and installation time is reduced by over 20%. The decking and insulation build-up can be installed by 3rd party joiners / builders.

Radical warm roof solution

Warm roof specifications made easy with the single coat application of Cure It ONE. Use Cure It ONE washers, to fix down the insulation boards and apply Cure It ONE directly to the insulation, quick and easy installation with no need for primer.
