Subject: Confirmation of Production Transfer to Környe, Hungary

Dear valued customer,

Following our previous communication regarding the planned closure of our Westerlo facility in Belgium, we are pleased to inform you that the transition of impacted products to our Környe site in Hungary is now confirmed.

Henkel's Környe facility is a state-of-the-art manufacturing site that meets the highest standards of quality, sustainability, and operational excellence. The transfer of production began in Q1 2026 with wave 1. We are now commencing wave 2 in Q2 2026 with the product(s) listed in Attachment A (the "Products") This phased approach will allow us to ensure continuity of supply and maintain the high quality and service levels you expect.

The final wave of product transfers is foreseen to take place in Q1 2027. You will receive further product-specific timelines and qualification details in subsequent communications.

Wherever possible raw materials, manufacturing equipment, manufacturing processes, manufacturing environment, QC test methods, and quality systems will be transferred as is to Környe. Where such transfer is not possible, we will use our best efforts to set up comparable production conditions.

In some cases, we will need to replace a raw material used in the formulation with an alternative registered under the same CAS number. The Products containing the alternative raw material have been thoroughly tested by Henkel to ensure compliance with Henkel's finished good specifications. The results show that the specifications currently valid remain consistent with the existing ones, and we do not anticipate any impact to form, fit, or function of the Products due to this change.

However, since we are not aware of all customer applications of a product as well as applied working conditions and since application possibilities might vary in each individual case, we recommend that you test the new material prior to application in order to validate whether it meets your specific requirements. We will provide side-by-side comparison data and samples upon request.

Please be assured that we use our best efforts to have the Products meet the quality standards that you are accustomed to, during transition as well as when manufactured in the new production setup in Környe. We are committed to maintaining the highest standards and to ensuring that all quality requirements are consistently fulfilled.

With the physical manufacturing taking place in Hungary, for EU-customers picking up the goods in Hungary and shipping them either within Hungary or to another EU-country, the VAT registration number of Henkel Belgium N.V. on the relating invoices will change to HU30456026. If this scenario is applicable to you, please add the VAT-Nr. HU30456026 to Henkel Belgium N.V. vendor master data or create the vendor Henkel Belgium N.V. with the VAT-Nr. HU30456026.

We appreciate your continued trust in Henkel and remain committed to supporting your business throughout this transition.

Should you have any questions or require further information, please contact your local Henkel Sales or Technical Service representative.

Sincerely,

Henkel AG & Co. KGaA
