

Subject: Supply Disruption Notification for selected Bonderite products

Dear Valued Customer,

We regret to inform you of a temporary supply disruption affecting certain Bonderite products due to an unexpected breakdown of a critical production machine at an external manufacturing supplier. While the issue is being resolved, the incident may still result in some delays until operations return to normal production levels.

The impacted products are listed below in Appendix 1 (the "Products"):

We are currently working to fully stabilize production and restore regular supply. However, due to the above-mentioned incident, we may not be able to fulfil placed orders or confirm future purchase orders for the affected products in the near term.

Please be assured that we have taken all necessary corrective actions, and our teams are working diligently to minimize the impact and resume standard service levels as quickly as possible.

We are also coordinating closely with our internal supply chain to manage available inventory and prioritize customer requirements.

We apologize for any inconvenience this situation may cause. Should you have any further questions, please do not hesitate to contact your local Henkel account manager.

Sincerely,

Dr. Geert Luyckx

Corporate Director

Country Manager Adhesive Technologies BeNeLux

Lukas Kulej

Regional Product Manager AMI EIMEA
