Subject: Announcement of a packaging change for SOCOSTRIP A0103N & SOCOSTRIP A0109N

Dear Customer,

We would like to inform you of a packaging change on our 20L pails for Socostrip A0103N and Socostrip A0109N.

This change has been decided in order to offer more security during transport. The product itself remains the same, and the price per litre remains the same as before. Only the price per packaging will be adapted to the new packaging volume.

Please find here the new references for both products

Product	Current Item Code	Current Volume (LTR)	New Item Code	New Volume (LTR)
SOCOSTRIP A0103N	P50101-20L-P-1	20	P50101-148	17
SOCOSTRIP A0109N	100264-126	20	100264-197	17

This change in packaging provides a **headspace** that allows the product to have enough room to move (without overflowing) during transport.

The switch will take effect towards **the end of February 2026**.

We value your business and trust that we can continue to support you and your colleagues throughout this evolution and into the future.

If you have any question, please do not hesitate to ask your usual point of contact within our team

Best regards

Mélanie RABIER
EMEA SPT & COATING Quality Manager
