**Subject:** Notification of Supplier Change – Bostik’s LIQ. 1685MC/  
LIQ. 1096MR Base Polymer

Dear Customer,

We are writing to inform you of an important update regarding the base polymer used in **Bostik’s LIQ. 1685MC** and **LIQ. 1096MR**.

The supplier of the previous base polymer has discontinued production of this raw material. As a result, Bostik has qualified and implemented an equivalent replacement polymer sourced from a new supplier. This updated material is chemically identical and matches the performance, properties, and specifications of the original polymer. It is produced using the same manufacturing technology, and no impact is expected on product functionality or regulatory compliance.

While Bostik does not anticipate any changes in performance of **LIQ. 1685MC** or **LIQ. 1096MR**, we recommend that customers perform their own verification testing, as application conditions and end-use requirements may vary.

Best regards,

**George Dorosh**
