This Message originated outside your organization.

Dear Valued Customer,

Product Update | 20th May 2026

We are writing to inform you of a temporary supply constraint regarding RTD Compound due to raw material availability. Our stock for the 500g tin (Part Code 53023) is low and have limited quantities remaining in other pack sizes: 50g (53020), 5kg (53026), and 18kg (53028).

To help minimise disruption to your operations, we recommend the following readily available alternatives, which can serve as direct replacements, depending on your specific application needs:

| Alternative | Application | Best for | Part code | Pack size | MOQ |
|----------------------------|--------------|--|-----------|---------------|-----|
| RTD Chlorine Free Compound | Brush or dip | Keeping product visibly on the tool tip | 53513 | 450g tin | 12 |
| RTD FOAMCUT Spray | Spray | Keeping product visibly on the tool tip | 53041 | 300ml aerosol | 12 |
| RTD Liquid | Hand applied | Filling holes or covering tool tips (low viscosity option) | 53072 | 400g bottle | 12 |
| | | | 53076 | 5L | 1 |
| | | | 53078 | 20L | 1 |
| | | | 53079 | 200L | 1 |

For assistance with product selection please contact your ROCOL representative or technical.lubricants@rocol.com.

We are actively working to replenish our stock and will keep you closely updated on the availability of the standard RTD Compound in the near future. We apologise for any inconvenience this temporary shortage may cause and appreciate your continued partnership.
