Subject: Supply Disruption Notification - Raw Material Shortage

Dear valued customer,

We regret having to inform you that the availability of a certain raw material used in the production of the products listed below (the "Products") has been impacted and limited due to the delay of inbound shipments within our supply chain.

As a result, our ability to supply the Products may be temporarily affected. While we are making every effort to minimize the impact, some existing orders may experience delays, and additional time may be required to confirm new orders until normal material availability is restored. Until our explicit written acceptance, orders shall not be deemed accepted.

We are closely monitoring the situation and using all commercially reasonable efforts to mitigate the impact through our global supply chain network and maintain continuity of supply wherever possible.

In case you have further questions please contact your local Henkel sales representative or customer service.

Sincerely,
Henkel Norden AB
