Subject: Supply disruption for LOCTITE SF products

Dear valued customer,

We regret to inform you of a disruption in the supply of a packaging component, which is affecting the availability of the products listed below:

149293	LOCTITE SF 7063 JC10L EGDF/SFDN/EPI/PL
1848436	LOCTITE SF 7064 10L EGFD/EPIG/SFDN
147514	LOCTITE SF 7070 10L EGFD/IT/ES/PT/SFDN

As a result of the production disruption, Henkel may not be able to meet your current demand for these products. In that respect, you may experience a delay in your confirmed deliveries. We will also need additional time to confirm new orders.

Please be assured that we are using all commercially reasonable means to leverage our global supply chain to address this situation, support our customers and avoid any further delivery disruption or delay as much as possible.

In the meantime, we may be able to offer alternative products in 400ml and 200l formats, which may differ from the standard 10 l packaging both in volume and product form (e.g., liquid versus aerosol). As a result, these alternatives may not be suitable for all applications. You may wish to consider whether such alternatives could support your needs. If so, please contact your local Henkel sales representative to discuss available options and assess suitability. We recommend evaluating and, where necessary, testing any alternatives prior to use. Any use of such alternatives remains the responsibility of the customer.

Should you have any further questions, please contact your local Henkel sales representative or customer service.

We regret any inconvenience this situation may cause to you and thank you for your understanding.

Sincerely,

Name: Micael Forsberg
