cutwel
Performance. Delivered.

The tooling partner precision engineers have trusted since 1996

40,000+ tools stocked in the UK

You can rely on Cutwel for fast delivery on an extensive range of cutting tools, machine tool accessories and measuring tools, with same day dispatch up to 5.30pm (Mon-Thur, 5pm Fri) for next day delivery.

Decades of hands-on expertise

With around 100 employees, the majority of Cutwel team members are homegrown long serving team members recruited direct from education or from the shop floor.

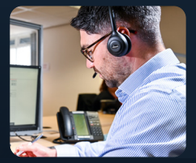

Trusted by 13,000+ precision engineers

Cutwel is trusted by more than 13,000 customers across the UK and Ireland, from global aerospace OEMs and leading manufacturers in F1, oil and gas, medical and automotive industries, through to small sub-contractors and jobbing shops.

Built on trust

Cutwel has grown to become the UK's largest specialist cutting tool distributor over the last 30 years, with a strong reputation for helping customers improve productivity and reduce machining costs.

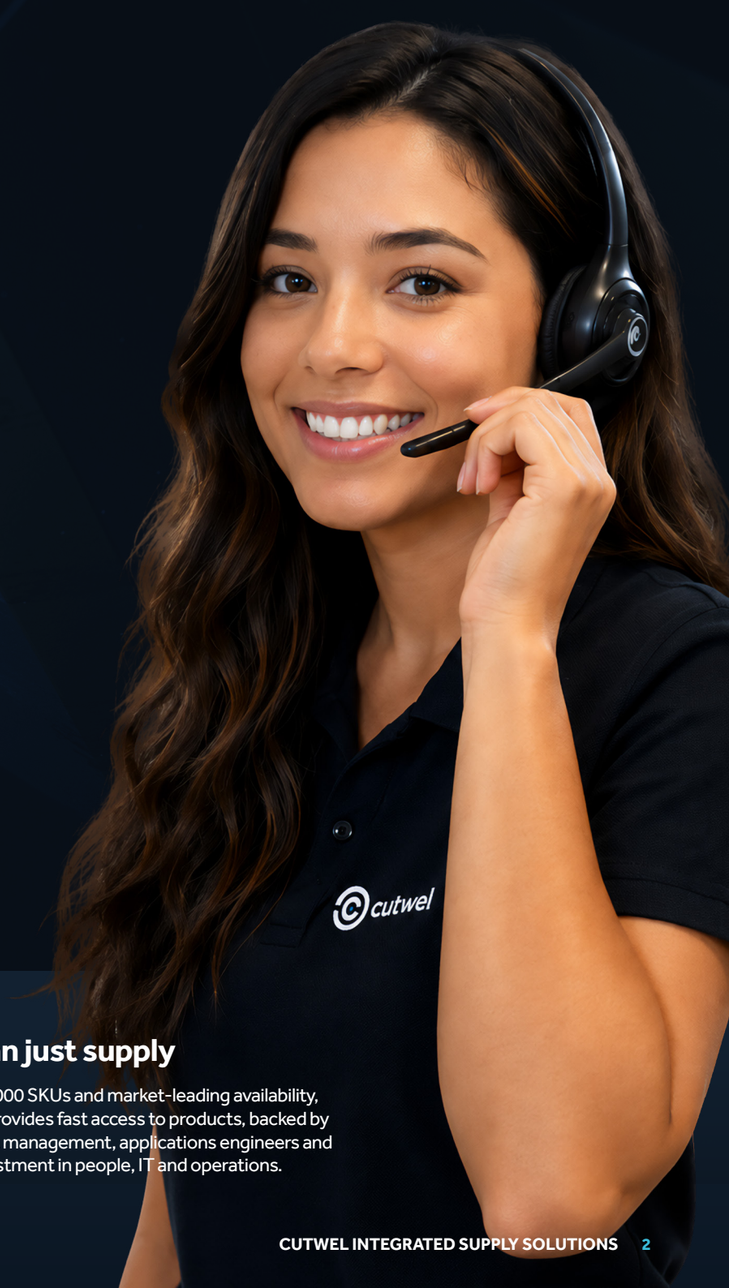

Expert support

Based in West Yorkshire, our in-house technical team supports customers across the UK and Ireland with product advice, technical knowledge and practical solutions for everyday machining challenges.

More than just supply

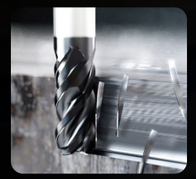

With over 150,000 SKUs and market-leading availability, Cutwel.co.uk provides fast access to products, backed by expert account management, applications engineers and continued investment in people, IT and operations.

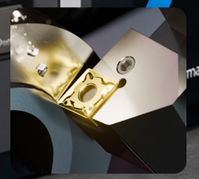

Cutwel Integrated Supply

As the UK's largest specialist distributor to the precision engineering sector, we've built a differentiated business over the last 30 years.

We help customers reduce costs and access market-leading service across cutting tools, machine tool accessories, inspection tools and machine shop lubricants.

Our integrated supply is built around your production

Save up to 25% on your tooling costs

Through our unique supply chain model, we deliver unbeatable savings on cutting tool spend without compromising on quality.

Tool vending inventory management

Give your team 24/7 access to essential tools, with full user reporting, stock control and cost savings of up to 50% through secure user access.

Dedicated application engineering support

Dedicated on-site applications engineers help reduce tool usage, improve processes and increase profitability.

Unlock your machine tool's hidden capacity

Our specialist team helps reduce your machine downtime with market-leading machine tool accessory solutions, increasing capacity at a fraction of the cost of new machinery.

Reduce tooling consumption

Our high-performance cutting fluids help reduce tool wear and manufacturing costs, supported by fluid management services for monitoring and control.

Measuring, gauging & inspection tools

As the UK's largest distributor of measuring tools, we give quality teams and shop floors access to world-class inspection products that support production.

Reduce your tooling spend by up to 25% with our unique supply chain model

For over 30 years, Cutwel has helped precision engineering businesses reduce costs and improve performance through market-leading supply, service and support across cutting tools, machine tool accessories, inspection tools and machine shop lubricants.

Exclusive supply partners

Founded 30 years ago as YG-1's sole UK agent, Cutwel now partners with 12 exclusive supply brands, cutting out up to three supply chain steps to pass savings on to customers. With extensive UK stock, we offer reliable next-day delivery and expert technical support.

UK technical product partners

Our exclusive product range is complimented by our UK TPP's (Technical Product Partners) that can offer you best-in-class products and technical support. These are brands you recognise and trust from major international manufacturers.

Own-brand product range for maximum value

Our range of own brand products can offer savings of up to 50% compared to other products and offer excellent quality with value for money.

Machine shop services

We work with a carefully selected range of partners to provide customers with services for UKAS calibration, regrinds, custom tools, cutting fluid management, angle head/driven tool repair and carbide recycling. By consolidating your service costs with Cutwel, you streamline your administration costs and reduce friction in your production support.

Dedicated application engineering support

Turning production problems into measurable improvements

Cutwel's **integrated supply customers** benefit from dedicated on-site support from experienced applications engineers.

By working closely with your team, we help reduce tooling costs, improve production efficiency and increase profitability.

Savings at the spindle

We support you in making time savings at the spindle, either through optimal cutting tool selection and cutting parameters, or eliminating downtime.

Our savings are documented with our own CORTEX software so you are fully informed of the productivity savings we are helping you deliver.

Standardisation

Implementing standardisation brings clarity and discipline to operations, helping teams reduce errors, improve quality and repeatability.

We work with you to standardise indexable tooling, align programming across different machine tools and implement standard operating procedures (SOPs).

Production challenges

We take on your most difficult jobs that are causing you problems and affecting your productivity.

Whether it is excessive tool usage, tool failure, long cycle times, quality failures, multiple set-ups or poor surface finish; we can support you in making difficult jobs problem free.

Expert training

We offer training for our integrated supply customers on best practice for cutting tool application, toolholding, workholding & lubricant maintenance.

This can be done at your site or at our dedicated training facility in Yorkshire.

Quarterly reviews

Our quarterly meetings with your production manager and senior management team allow us to communicate our savings we have delivered on your shop floor, whilst also identifying any pain points and goals for the next quarter.

Features & Benefits

Optimised Stockholding

Hold the right quantity of tooling at the point of use, without tying up capital in unnecessary stock.

Immediate Tool Access

Give operators instant access to essential tooling, exactly when and where it is needed.

Automatic Reordering

Minimum stock levels automatically trigger replenishment, maintaining availability without time consuming manual checks.

Secure Identification

Operators can quickly locate and withdraw approved tooling using a secure RFID card or PIN.

Reduced Search Time

Store essential tooling in one controlled location, reducing time spent locating, requesting and collecting items.

Fewer Tooling Delays

Keep essential tooling available at the point of use, reducing delays caused by missing or unavailable items.

THE CUTWEL DIFFERENCE

Installation, training, replenishment and ongoing inventory reviews included.

Reduce searching time, stock shortages and production bottlenecks by keeping essential tooling controlled, available and close to the point of use

Fully managed consignment stock

We manage your essential consumable tooling through our vending machines and software, giving you 24/7 access to the tools you need. Stock is maintained to minimise shortages and reduce manual refilling.

Dynamic inventory management

We keep your machine stocked with the latest cutting tool technology, replacing older products with more productive alternatives and removing slow-moving items to free up capacity.

Full visibility reporting

Access detailed reports on tool usage, users, job numbers, cost centres and more. Custom reporting is also available, helping you identify savings and reduce tooling costs.

Control & security

Set different access levels by role, department or job type. Secure RFID or PIN access controls who can withdraw tooling, while every stock movement remains traceable.

Lower tooling administration costs

Reduce purchase orders, manual stock checks and time spent managing routine tooling requirements.

Complete control of tooling access, stock and reporting

Manage user access, issue tooling and generate detailed reports through one connected system.

Fully managed tooling inventory and replenishment service

Reduce time spent searching for tools, prevent stock shortages and minimise production delays by keeping essential tooling controlled, available and close to the point of use.

Track transactions, purchase orders, inventory levels and usage through detailed reporting, giving you clear visibility and greater control over tooling stock.

Custom Reports

Create custom reports specifically designed for your needs.

Purchasing

Keep track of your suppliers and open purchase orders.

Report Export

Export reports in the format you need, whenever required.

Inventory

Show stockholding, get alerts and show dead and slow inventory.

Cost Allocation

Efficient allocation of our costs and show value of stockholding.

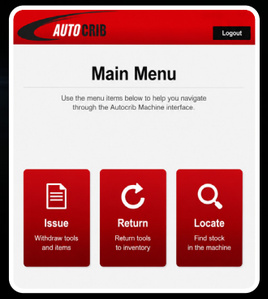

Usage

Show usage by employee, project, machine or in a specific period.

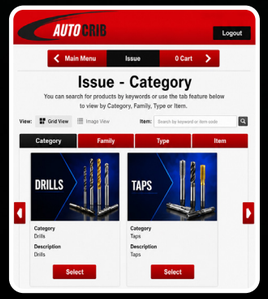

Simple access and full control

Set access permissions by user, role or department, while maintaining full visibility of stock, user activity, cost allocation and usage.

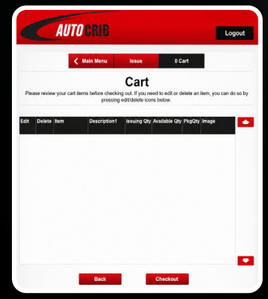

- **Simple, intuitive user interface**
- **Issue and return items through one system**
- **Add multiple items using the shopping cart**
- **Automatically generated reports**

1 Log In
Secure user access

2 Search or select
Search by category or product

3 Add multiple items
Build your order using the cart feature

4 Collect tooling
Retrieve your issued items

Tooling solutions for every industry

Cutting tools, technical expertise and application support for UK manufacturers.

Medical

High-precision tooling for implants, bone screws, surgical instruments and other critical components where accuracy and finish are essential.

Aerospace

Solutions for turbine blades, blisks, landing gear, casings and difficult aerospace materials requiring reliable, repeatable machining.

Oil & Gas

Robust tooling for valves, flanges, pipes and critical components machined from tough alloys in demanding environments.

General Manufacturing

Reliable tooling for shafts, housings, gears and production parts where consistency, throughput and tool life matter.

Heavy Engineering

High-performance solutions for large castings, forgings and heavy duty components requiring rigidity and secure material removal.

General Engineering

Flexible support for sub-contractors and job shops machining a wide variety of materials, components and batch sizes.

Motorsport

High-performance tooling for race critical components where precision, speed, consistency and repeatable results are essential.

Die & Mould

Accurate, dependable solutions for mould tools, cavities, electrodes and detailed components with high surface finish demands.

Rail

Engineering support for rail components, structural parts and maintenance applications where reliability and durability are key.

The trusted precision tooling partner

With over **13,000** active customers across the UK and Ireland, Cutwel has an extensive range customers in the precision engineering sector in every region of the British Isles.

Our customer base ranges from the world's leading OEMs, tier 1 & 2 manufacturers and unparalleled access to the UK SME precision engineering market.
