Administrative change of our legal entity

Dear Valued Business Partner,

As outlined in our previous communication, our business has become the standalone company Surventis. By September 30th, all of our legal entities globally will be renamed to reflect our new name.

As a customer of 'Chemetall U.S., Inc.', we want to inform you that the renaming of this entity is officially completed now. **The entity is now called 'Surventis Surface Treatment LLC'**. To ensure business continuity, please update the new name in all relevant systems on your end with immediate effect. To ensure accuracy of U.S. tax information in your systems, please find attached an updated W9 form to reflect our company name change.

This change is limited to the company name. It does not affect our equity structure, legal representative, registered capital, business scope, office address, contact information, or business team. Also, administrative information such as VAT, Tax, DUNS and IBAN do not change. Your respective account manager will reach out to you to ensure a smooth transition in line with your company's procedures.

Please be aware that **no relabeling of our products is required**, as per the agreement with BASF. Any products bearing BASF trade names that are already in production or in inventory will continue to be sold in the ordinary course of business. The transition period in which products under the old name may still be produced is **nine (9) months** after July 1st, or **twelve (12) months for Chemetall cans**. Label adaptations for newly produced products will start about 3 months after July 1st.

If you have any further questions, please do not hesitate to contact your local sales or customer care representatives.

Thank you for your support. We are looking forward to continuing our partnership with you!
