**Product drawing & dimensions:**

Overall product size (mm): 580x440x195 corner radius 10

Undermount  
All details are provided in good faith and within tolerances of the manufacturers process.  
We recommend that a cut out is made in timber and checked against the actual sink that has been supplied before cutting the work-surface.  
Abode cannot accept liability for problems or cost incurred by failure to follow this advice.  
All dimensions, weights and measures are subject to change without prior notice. Errors and omissions accepted.

INSET  
To inset fit, you may need to create a notch in the underside of the work top to allow clearance for the overflow body

**Attention notes:**

**\*Important fabricator notes for Undermount, Apron Front & Flushmount sinks:**

The cut out size indicated is aligned with outside edge of the bowl top radius (similar to the example below):

You should confirm with your client if the worksurface cutout is to be cut flush, inside or outside this suggested perimeter shape & size.

If you create the cutout smaller or larger than the indicated size then the fit of the accessories may be affected and should be physically checked.

**General:**

All details are provided in good faith but do not include the tolerances of the material or manufacturing process.

We request that a test cutout is made in scrap timber and checked against the actual sink to be installed before committing to cutting the final worksurface.

Abode can not accept liability for problems or costs incurred by failure to follow this request.

CAD cutout files can be downloaded from [www.abodedesigns.co.uk](http://www.abodedesigns.co.uk)
