Wiring Diagram:

1. DMX console connection:

* If the recoil effect occurs because of longer signal line or bad line quality, please try to connect 0.25W 90-120Ω terminal resistor at the end of each line.

2 Connecting LED lights:

3. The connection diagram of 4 kinds of DMX/RDM terminals:

5-pin XLR Connected in Parallel

3-pin XLR Connected in Parallel

Green Terminal Connected in Parallel

Installation distance > 20mm

RJ45 Connected in Parallel

These 4 terminals can be connected in a mixed way.

***Installation Attention :** please reserve enough ventilation distance between decoders (>20mm), be sure not to block the vent, or will affect lifetime of decoder for poor heat dissipation.

4. The connection diagram of AMP signal amplifier terminal:

- * Connecting with green terminal or an extra amplifier will be needed when more than 32 decoders are connected or use overlong signal wire(as shown below).
Signal amplifier should not be more than 5 times continuously.
