

⚠ WARNING

1. To avoid electric shock, disconnect power at source prior to installation.
2. The installation should be performed by qualified electricians or lighting technicians.
3. Before installation, maintenance, or removal, disable all power.
4. Do not touch the fixture while it is in service.
5. If there is any problem with the fixture, turn off power and **DO NOT** attempt repair unless you are a qualified technician or the customer service member.

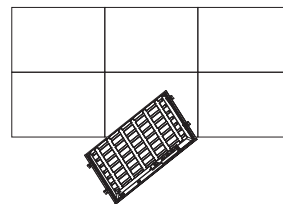

Recessed Installation

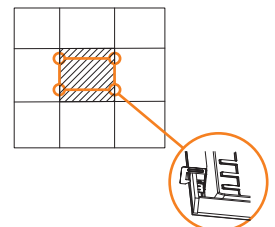

1 Remove the original ceiling panel. Lift the mounting brackets and twist them 90° into position.

2 Ensure that the power is turned off at the breaker. Connect power to the driver as show in the **Wiring Diagram**.

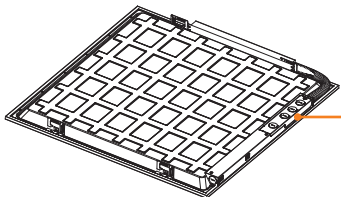

3 Place the fixture with it's four (4) mounting brackets so that they are positioned above the T-bar.

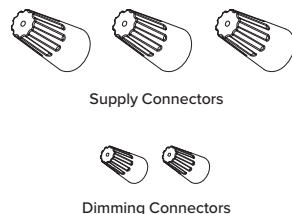

4 Gently rest the fixture onto the T-bar and ensure that it fits properly.

Accessories

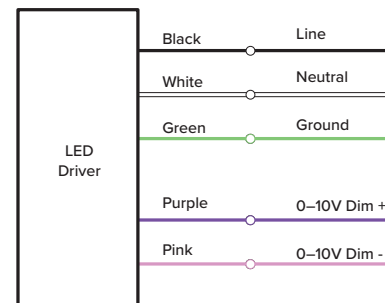

Included inside the power compartment.

Supply Connectors

Dimming Connectors

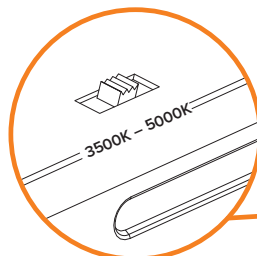

Wiring Diagram

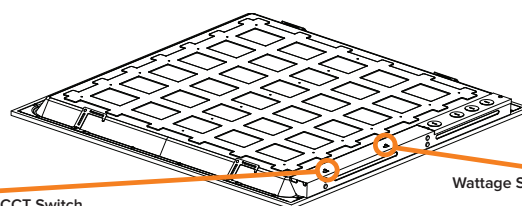

Field Adjustable Wattage and CCT

1 Kelvin and wattage can be adjusted using the dip switches located on the driver.

2 Select the desired kelvin and wattage by sliding the dip switch.
