abode

About Us

From our family to yours, we inspire and enhance homes with heart and passion in everything we do.

Abode is brought to you by a team of specialists with a passion for our products but moreover, our customers. Established in 2002 and with members of the team who have been with us since the very beginning, our people are a key ingredient in what makes Abode so unique and loved by so many.

When we ask our customers why they choose Abode, time and time again, they say the same three things: **Design, Quality and Service.**

Design

We design exclusive product collections in Britain each year, enabling our customers to personalise the most important and functional rooms in their home with products that are a reflection of their personal style.

Our team of industry specialists always have their finger on the pulse of the latest trends, enabling us to deliver new products each year that perfectly complement our customers designs, giving the ability to express an element of their personality in each room they transform.

From beautiful kitchen taps to life-enhancing instant boiling water taps, paired with a functional kitchen sink; the kitchen wet zone can be fully crafted with Abode products and accessories to create a showstopping focal point when entertaining as well as being supremely functional for everyday living.

But don't just take our word for it. We are renowned for award winning product design and have been recognised by various industry awards.

Quality & Service

You can rest assured when choosing those all-important finishing touches for your home that Abode is the right choice.

As well as designing our products, we put each and every one of them through rigorous testing both in the UK and in the manufacturing facilities to ensure that when our products make their way to the centre of your home and daily life, that they will stand the test of time.

However, if you do ever need us our friendly and experienced team are here for you. We have experts available on the end of the phone at our Barnsley offices and they pride themselves on ensuring our customers receive the very best service every time they might need us. We also operate a comprehensive spares service for all Abode products to ensure they can be responsibly maintained when needed rather than replaced.

Material

1

Stainless Steel

Stainless Steel is a timeless material which remains a popular choice. It is often a perfect match to the kitchen appliances so provides a coordinated finishing touch. As well as the aesthetics, it is easy to maintain and is extremely durable. All Abode sinks are constructed from premium 304 grade stainless steel and are available in an array of designs.

hygienic · *easy to clean* · *high heat resistance* · *stain resistant* · *corrosion resistant* · *premium grade stainless steel*

Granite

SiOForm® is a unique material solution engineered specially for our granite kitchen sink collection. The material is primarily made of pure and natural quartz, a material that is strong, resilient and extremely durable, making it an ideal addition for your kitchen. SiOForm® products have a uniform void-free structure and are resistant very high temperatures. Granite sinks are also great at retaining water temperature, making them perfect for any busy kitchen environment. Our range consists of several unique designs in various shapes, sizes and colours that create a striking focal point in your kitchen. The new Taupe Grey finish is a perfect compliment to warm tone worktops which are increasing popular.

SioForm+ is our new granite sink material that is engineered to withstand the test of time and the demands of a busy kitchen. We have refined the SiOForm recipe and delivered enhanced levels of performance and style. Exclusive to our new Linaro range and available in three contemporary flat finishes (no flecks or sparkles) SiOForm+ brings a fresh, refined look to any kitchen.

hygienic · *easy to clean* · *uniform structure* · *high content of natural mineral* · *stain resistant* · *scratch resistant* · *impact resistant* · *thermal shock resistant* · *surface abrasion resistant*

SiOForm® is available in the following colours:

White Granite · *Frost White* · *Grey Metallic* · *Black Metallic* · NEW *Taupe Grey*

SiOForm+ is available in the following colours:

NEW *Pure Black* · NEW *Pure White* · NEW *Slate Grey*

Ceramic

Our ceramic sinks are constructed from the finest grade fireclay and are hand finished for a premium quality finish. This traditional classic is available in undermount, apron front and inset options, providing an elegant finish every time. The glazing process ensures a long lasting and durable finish.

hygienic · *easy to clean* · *high heat resistance* · *stain resistant* · *chemical resistant* · *durable and long lasting*

Sink Types

Undermount

An undermount sink is installed under the worktop for a seamless, premium finish.

Undermount sinks will work with a wide variety of worktop surfaces. Why not try pairing yours with a solid surface or granite worktop? There are a large range of bowl sizes and configurations to choose from in this offer, providing ultimate versatility when it comes to usage requirements. The tap is often mounted on the worktop, adding to the premium, sleek look.

Apron Front

This range consists of our Belfast and Provincial products.

They are installed under the worktop with the front face visible so require a base cabinet with a specific height to house them. Traditionally these products are ceramic.

Inset

An inset sink sits on top of the worktop and can be installed in any material, including laminate.

An inset sink will often have a drainer integrated for ease and durable functionality.
The tap is usually mounted on the sink and often these designs have two tap holes so they are reversible, meaning the drainer can be positioned either left or right.

Sink Sizes

Across our comprehensive sink collection, we have several sink sizes available. In the initial planning stages, it is important to consider how the kitchen is to be used to determine which option is best suited to your lifestyle requirements.

How do you use your sink? What would make your daily tasks easier so you can focus on the more important things? For example; what typically needs to fit in the main bowl? Is a larger main bowl size needed? Would the addition of a half bowl be beneficial? Is a drainer required?

Examples are as follows;

Single Half Bowl

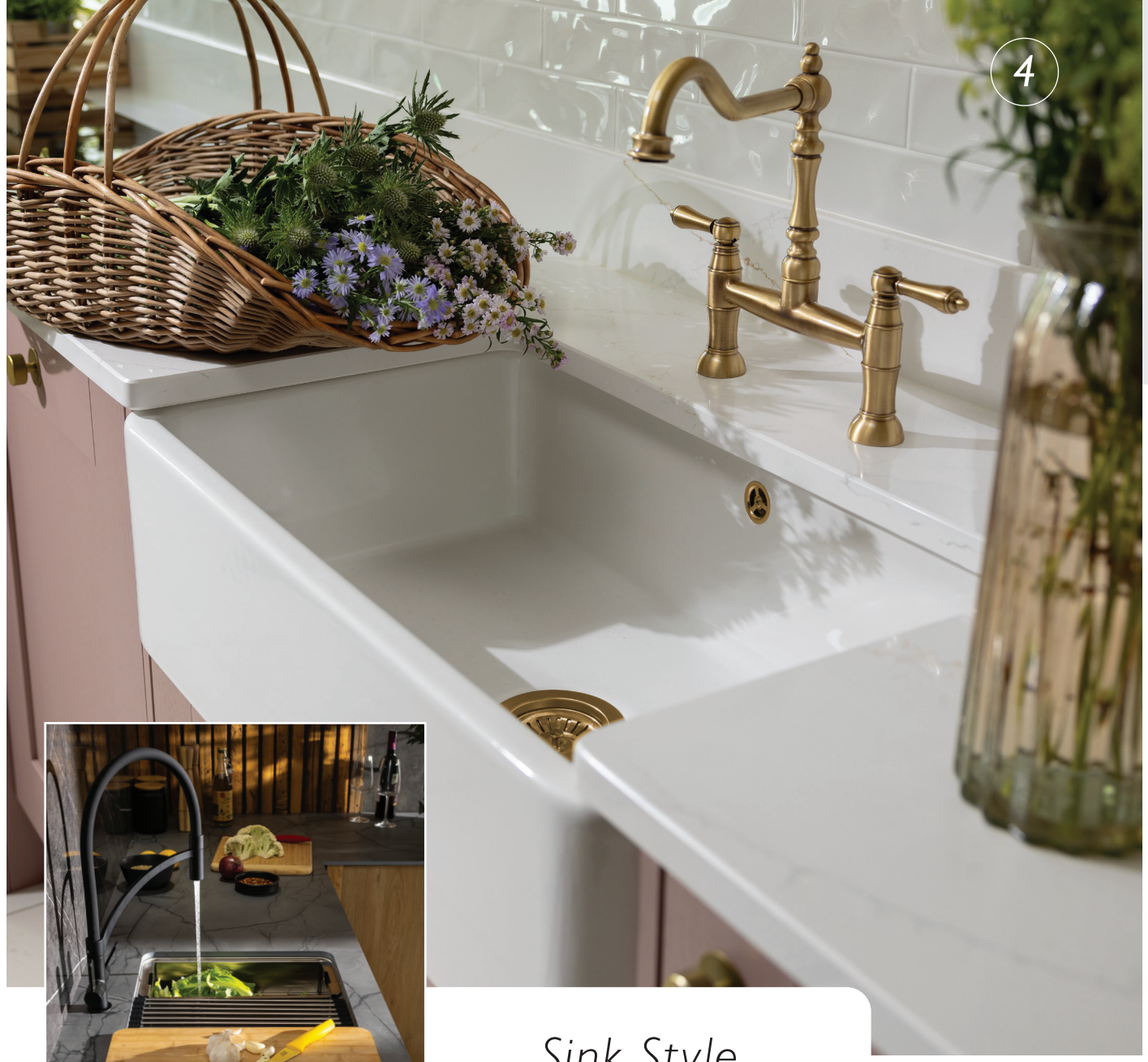
Double Bowl

Single Bowl

Large Bowl

1.5 Bowl

Extra Large Bowl



Sink Style

The overall style of the kitchen will go a way to dictate the perfect sink and tap pairing. Bring colour into the kitchen with a granite sink and either a perfectly matched or contrasting tap pairing.

For example; an industrial style kitchen with dark colourways looks great with a stainless steel or granite sink plus a perfectly matched tap in stainless steel, black, or graphite. However, consider the finer details such as the handles or any key detailing on appliances/accessories in the kitchen when selecting the perfect tap finish, it may be that a brass or neutral tone is more suited to complement the kitchen overall.

Sink Features

Look out for the following features on selected sink ranges

Flush Plate Overflow

This removable overflow cover has the following benefits;

- Removable for improved sink hygiene (easy clean)
- Provides a sleek, premium finish
- Constructed from solid stainless steel

Top Mounted Overflow

- Allows for maximum bowl filling
- Dispose of drinks even when the bowl is full
- Applies to the Neron, Synchronist and Optima Belfast ranges

Orbit Waste

- Provides a minimalist look, whilst removing unsightly debris from view
- Constructed from stainless steel and rubberised plastic
- Dishwasher safe, as well as being easy to empty

All Abode Sinks are supplied with pipework

Look out for the following symbols throughout this section:

reversible

Overflow or drainer can be positioned either left or right.

2nd tap hole for Swich

undermount or inset

undermount only

Stainless Steel Undermounts

Understated simplicity

It's not just the material that's versatile but the range of products in this offer.

We're confident you'll find the perfect solution from our stainless steel undermount collection. Whether you're looking for a small single bowl, one and a half bowl, large bowl or even an extra large bowl!

We also have ranges which allow you to create the undermount look without the expense of solid surface. Take a look at our R15 range which can be either undermounted or inset so worktop material doesn't restrict you from creating the look you desire.

SYSTEM SYNC

The innovative System Sync, designed to work with you and your kitchen.

Overflowing with features and versatility that offers up superlative functionality, maximises workflow, and liberates worktops.

With the combination of bowl sizes available, flexible 2IN1 installation, integrated smart rail and a range of accessories.

System Sync offers so much more than bowls to simply wash up in, it allows for a whole host of kitchen tasks to be performed super efficiently - saving time and space for those things that matter.

System Sync bowls have been expertly crafted from 0.8mm 304 grade brushed stainless steel to ensure a finish that is as durable as it is sleek and stylish.

All accessories are tailored to fit System Sync perfectly and are stackable to further optimise space.

Simplify. Streamline. Synchronise with **System Sync**

Features & Benefits

- **Build Your Perfect Workstation.** System Sync can be installed in an array of combinations, as well as either inset or undermount. An efficient solution for any size space.
- **Durable 304 Stainless Steel Construction.** Resilient 1mm thick material ensures long lasting performance, resisting stains corrosion and high heat.
- **Efficiency Re-imagined.** Offering up more than just bowls to wash up in, System Sync allows for a whole host of kitchen tasks to be performed super effortlessly.
- **The Perfect Fit.** Built around the accessory trio and integrated smart rail. Allowing for maximal workflow with minimal space.
- **Sophisticated Brushed Finish.** Adds a polished, refined look while resisting watermarks and scratches for easy maintenance.
- **Orbit Waste with Fold Back Basket.** A seamless waste solution that keeps debris out of site while being simple to clean for improved sink hygiene.
- **Complete Solution.** Includes all necessary components for easy installation and everyday use.
- **Waste Disposer Compatibility.** The 90mm waste hole accommodates modern waste disposers, adding further functionality to your kitchen setup.

Matrix Collection

From the sharp square corners of the R0 collection to the smooth round edges of the R50, this versatile collection of stainless steel sinks enables a series of design possibilities.

Look no further than our R15 collection which can be both inset or undermounted, meaning there are no restrictions no matter what worktop is chosen. Inset mounting the product means this is also a fast-fit solution and with so many bowl sizes to choose from the perfect kitchen solution is at your fingertips.

Features & Benefits

- **Timeless Elegance.** Enhances contemporary kitchens with sleek, minimalist design.
- **Enduring Quality.** Built from robust materials to provide years of reliable performance.
- **Increased Functionality.** Accommodates the demands of busy kitchens with spacious, practical features.
- **Perfect Pairing.** Complements popular appliance styles for a seamless, cohesive kitchen aesthetic.
- **Deep Sink Bowls.** Designed to handle larger pots, pans, and cookware with ease. A seamless, cohesive kitchen aesthetic.
- **Flush-Plate Overflow:** Offers an easy-to-clean design for added convenience.

The Optima Belfast Sink is a bold reinvention of the classic design, designed in the UK to meet the needs of modern living.

With a refined aesthetic and practical design features, it offers a fresh, contemporary take on a kitchen icon. Its reversible apron front, smooth on one side and fluted on the other, allows for complete design flexibility, while four on-trend matt finishes make it a perfect match for today's kitchens.

Precision engineered for a perfect fit every time, the Optima Belfast sink delivers form and function in equal measure.

Features & Benefits

- Reversible apron front. Smooth one side, fluted the other.
- Four on-trend matt finishes.
- Integrated sluice bowl and branded overflow.
- Compatible with Abode accessory trio.
- Perfect match for shaker-style matt kitchen doors.

At Abode, we believe great design should be accessible to all. That's why we created LivInc, a purpose-built sink and tap collection that delivers on style, safety, and functionality for inclusive kitchen living. Designed and developed in-house to meet real-world needs, LivInc goes beyond repurposing standard products to offer a truly integrated solution for modern, accessible kitchens. Beautifully engineered and thoughtfully detailed, LivInc makes inclusive living a seamless part of everyday life.

Wastes and overflows

Luxury In Every Detail

Sometimes, the most powerful design elements lie in the details. Our collection of sink wastes and overflows in Matt Black, Antique Brass and Brushed Brass allows for an extra layer of customisation, ensuring every element of your kitchen contributes to the overall aesthetic

A Brushed Brass basket strainer waste paired with the GR15 sink in Black Metallic Granite adds a sense of quiet luxury, while a Matt Black basket strainer waste and Rectangular Flush Plate Overflow introduce a striking contrast against our Stainless Steel R15 range. These finishing touches may be subtle, but their impact is anything but.

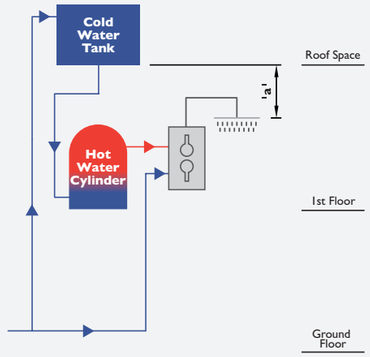
Boiler Types

Which type of boiler do I have?

3 types of boiler systems exist: gravity-fed, combi boiler and unvented - and each can influence water pressure differently.

Gravity-Fed

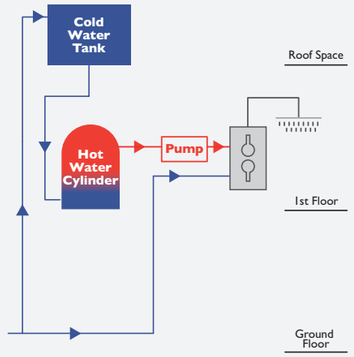
Found in older UK housing with the following features typically:



- Typically features a cold-water tank in the loft and a hot water cylinder elsewhere in the house.
- Hot and cold pressures are typically unbalanced (the cold-water pressure is higher than the hot). Cold water pressure is as per incoming mains.
- Hot water pressure (head pressure) is distance 'a' in metres divided by 10. For examples if 'a' is 1 metre then the hot water pressure is approximately 0.1 bar.
- This type of system is generally considered as **low pressure.**

Gravity-Fed (pumped)

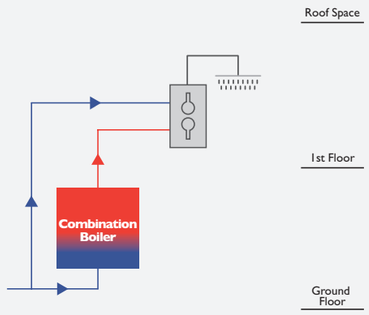
Found in older UK housing that has been modernised.



- Hot and cold pressures are typically unbalanced (depending on the cold mains pressure and the rating of the hot water pump). Cold water pressure is as per incoming mains.
- Hot water pressure is as per the pump rating.
- This type of system is generally considered as **high pressure.**

Combi Boiler

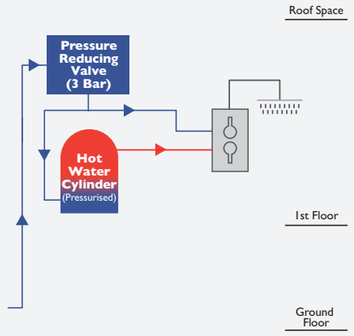
Found in newer UK housing.



- Generally found wall-mounted in the kitchen.
- Cold water pressure is as per the incoming mains.
- Hot water pressure is as per incoming mains but generally reduced slightly due to pressure reducing valves, filters and flow limiters.
- This type of system is generally considered as **medium - high pressure.**

Unvented

In UK housing with a hot water tank but no cold tank.



- The cylinder(s) can be located anywhere in the house.
- Hot and cold pressures are typically balanced.
- Hot and cold-water pressure is typically 3 bar (as shown), otherwise the hot and cold pressure will be approximately the same as the incoming mains cold pressure.
- This type of system is generally considered as **high pressure.**

Aerators

Abode taps use spout aerators or flow straighteners to add bubbles to the water. The aerators we use are of premium quality, ensuring the water flow is always controlled to eliminate splash back in use.

Valves

Abode use ceramic disc valves which are tested for over **200,000 cycles** before we will pass them for use within our taps. We do this to ensure that under normal use conditions your tap valves have proven that they will work for many years to come.

Assurance

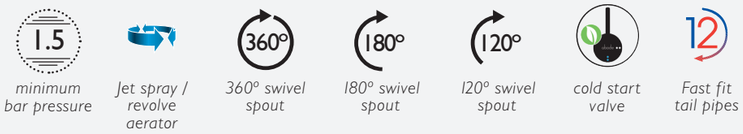
Abode taps undergo extensive quality testing including; robotic production of parts for complete precision and 100% end of line testing.

Our sophisticated hand polishing, plating, powder coating and lacquering techniques are also put through rigorous testing to ensure optimum performance. This includes: salt spray testing for 100 - 200 hours and surface resistance tests for 200 cycles using varying corrosives. We really put our products through the mill before we bring them to market to give our customers complete peace of mind.

Everything in the box

After taking all this care, we want to ensure our products reach you in perfect condition, with all the parts that you will need for a seamless and straightforward installation. Fixing kits and tail pipes (with non return valves where necessary) are provided. If the tap is heavy or tall, we also include a tap stabilisation bracket. We are also working hard to enhance the recyclability of our packaging in line with our company ESG targets.

Throughout this section you will see the following symbols next to products where relevant:



minimum bar pressure | *Jet spray / revolve aerator* | *360° swivel spout* | *180° swivel spout* | *120° swivel spout* | *cold start valve* | *Fast fit tail pipes*

NEW

Boiling Water Taps

The new Abode boiling water taps bring together beautifully considered design and effortless performance. They deliver a smooth, seamless flow with no splashing, no fuss, and absolutely no hot air - just pure functionality shaped around real life.

Every detail is crafted with intention, giving you freedom from hype, freedom from compromise, and complete freedom to design without limits.

No Hype. No Compromises. No Limits on Your Design.

Intuitive design. Visible safety.
A smooth, quiet and consistent flow every time for optimum safety.

Always innovative. Endlessly perfected.
Award-winning British design, refined and enhanced to meet evolving trends and needs.

Personalised designs. Unique finishing touches.
Choose from a wide range of designs, finishes and textures for the perfect fit.

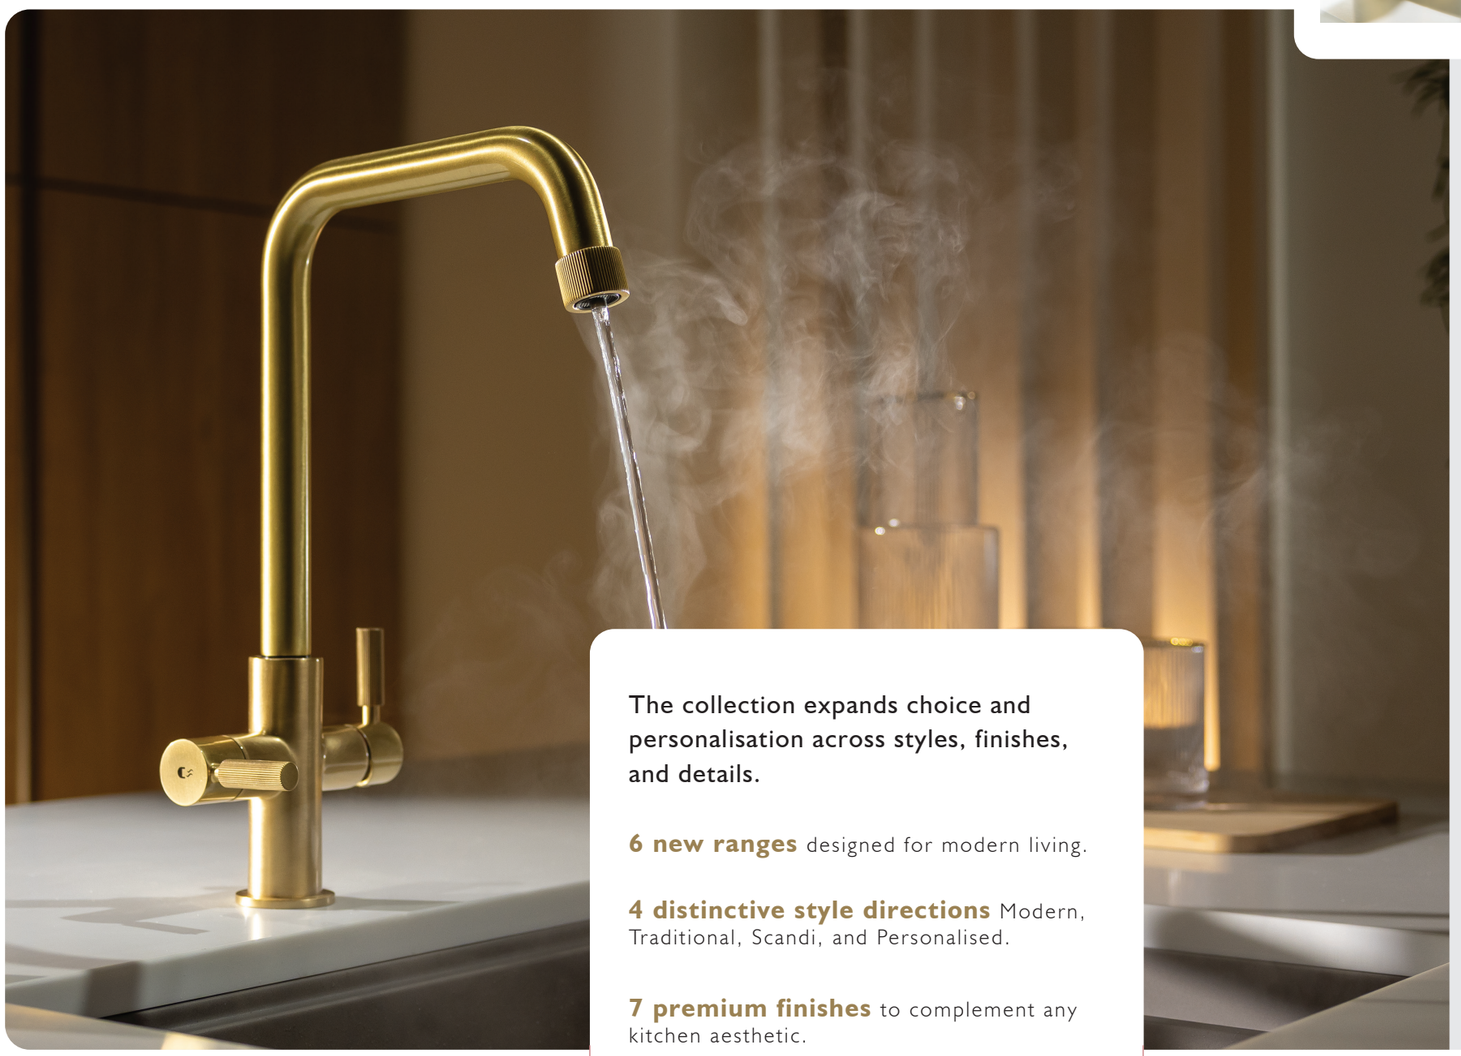
Premium quality. Accessible price.
Desirability and affordability in equal measure.

Extensively tested. Expertly supported.
Designed, tested and supported by our UK-based team.

NEW

Beautifully Designed Boiling Water Taps

The new Abode boiling water tap collection is shaped by real design insight and the way people live today. Every tap delivers instant boiling water with a smooth, seamless flow - no splashing, no fuss, and no hype. It's thoughtful engineering paired with purposeful design, giving you the freedom to create a kitchen that feels unmistakably yours.



The collection expands choice and personalisation across styles, finishes, and details.

6 new ranges designed for modern living.

4 distinctive style directions Modern, Traditional, Scandi, and Personalised.

7 premium finishes to complement any kitchen aesthetic.

Interchangeable handles including fluted, textured, plain, and wood options.

Our Styles

The new Abode boiling water tap collection reflects the defining directions shaping today's kitchen.

Modern

Minimal lines and seamless functionality create a clean, confident kitchen aesthetic. Instant boiling water delivered with effortless, contemporary precision.

Traditional

Classic form meets modern convenience, bringing timeless elegance to the heart of the home. A heritage look elevated by the instant performance today's kitchens expect.

Scandi/Japandi

A Scandi-inspired collection that blends natural warmth with effortless simplicity. Pure lines, organic textures, and tactile finishes create a calming Nordic aesthetic that brings harmony to your kitchen design.

Personalised

Personalise your boiling water tap to suit your style, with interchangeable handles and finishes available in fluted, textured, plain, and beautifully crafted wood options.

Why Choose Abode Instant Boiling Water Taps?

Our instant boiling water taps have been thoughtfully engineered with safety, performance, and peace of mind at their core. Every element from the dispensing mechanism to the temperature control within the boiler tank has been designed to deliver boiling water safely and reliably.

To ensure the highest standards, our entire boiling water tap collection has been developed in full consideration of Regulation 4 (Part G(3)) of the UK Building Regulations. This means our taps are not only built to perform but are designed to meet stringent UK safety requirements. All Abode boiling water taps, boilers, and filters have approvals pending, reinforcing our commitment to delivering products you can trust.

Choose Abode for instant boiling water tap solutions that combine innovation, compliance, and complete confidence in everyday use.

NEW

Persona
Boiling Water Tap

Personalised style. Instant convenience.

The Persona boiling water tap pairs a slim, modern silhouette with on demand boiling water, bringing effortless convenience to today's busy kitchens. Its clean, understated design complements any contemporary space while making everyday tasks quicker, safer, and more efficient.

For added personalisation, optional fluted or diamond knurled handle and aerator packs introduce texture, individuality, and the opportunity to create a striking colour contrast. Persona is a smart, time saving upgrade that quickly becomes an indispensable part of your daily kitchen routine.

PB3X

The Next Generation Boiler

The PB3X delivers high efficiency, generous capacity, and a range of advanced features, all in a compact size.

All Abode boiling water taps are supplied with a PB3X boiler and premium water optimisation filter.

PB3X. Unique technology. Advanced performance. Smart efficiency. Designed for today's kitchen.

- **Patent Pending Eco Mode technology.** This exclusive technology delivers exceptionally low keep-warm energy usage.
- **3L capacity.** An optimum amount on demand for busy households.
- **Fits under a Belfast sink.** Compact design fits comfortably under any sink with space leftover.
- **Superior insulation.** Provides quieter, more efficient operation
- **Away-from-home and Boost modes.** Additional functionality for enhanced efficiency and accelerated performance when needed.
- **Faster heat-up performance.** Advanced element for improved convenience.
- **Premium limescale protection.** Extends boiler lifespan and maintains optimum performance, even in hard water areas.
- **Intelligent filter & descale management.** Tailor maintenance prompts based on local water quality and usage.
- **Comprehensive warranty.** 3 years on the boiler and 5 years on the tap for peace of mind.
- **Enhanced services.** New subscription and maintenance services now available for system maintenance.

3 Years Warranty — *Boiler*

5 Years Warranty — *Tap*

Water Filter

Always Protected

National team of over 30 service engineers across the UK should you need us.

Abode boilers are protected by our filters (supplied with all system purchases). These filters are essential to ensure protection of your boiler from scale build up as well as reducing water hardness out of the tap to improve taste and clarity of hot drinks.

Industrial Style Taps

Add soft industrial touches and texture to your kitchen design with the Hex and Fraction families. Our industrial taps offer will coordinate effortlessly with any kitchen featuring industrial style elements or add interest and edge to a kitchen design featuring traditional elements.

HEX

GOLD WINNER
Innovation in Functionality

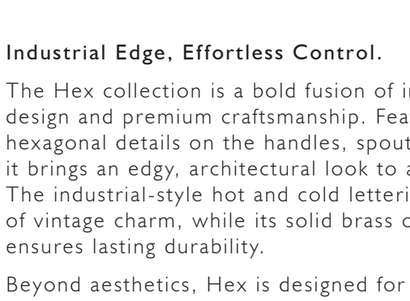
Hex Collection

Industrial Edge, Effortless Control.

The Hex collection is a bold fusion of industrial design and premium craftsmanship. Featuring striking hexagonal details on the handles, spout tip, and base, it brings an edgy, architectural look to any kitchen. The industrial-style hot and cold lettering adds a touch of vintage charm, while its solid brass construction ensures lasting durability.

Beyond aesthetics, Hex is designed for effortless performance. Ceramic disc valve technology provides ultra-smooth flow and precise temperature control, while flexible tail pipes and pre-fitted check valves make installation simple.

Available in a range of striking finishes, its the perfect finishing touch for a contemporary kitchen.



Features & Benefits

- Hexagonal details and diamond-knurled finishes create a bold, modern aesthetic.
- Perfect for Statement Kitchens. A bold and unique design element that complements a vast range of interiors.
- Vintage Inspired Hot & Cold Lettering.
- Premium Quality Brass Construction.
- Modern Ceramic Disc Technology. Allows for precise and effortless water control.

Benefits of a Water Filter Tap

Water Quality:
An Aquifier tap or Swich device filters particulates from water, reduces the taste and odour of chlorine and reduces water hardness.

Health:
Having filtered cold water on tap can encourage the consumption of more water. Fill a reusable water bottle each day directly from the tap.

Environment:
By removing the need for bottled mineral water every home with an Aquifier product is doing their bit for the environment by reducing single use plastic consumption.

Cost:
If bottled mineral water is a frequent purchase in your household you can save considerable amounts each year by switching to an Aquifier or Swich product.

Space saving:
If you have a water filtration jug or bought bottled water just think how much space you can free up in the fridge.

Appliance health:
If you live in an area with particularly hard water you will notice that the kettle suffers as a result of the limescale build up over time. Fill your kettle with filtered water and prolong its life.

How Aquifiers work

How often do I replace my filter?

It's simple to maintain your filter, it sits in a bracket, in the base cabinet below the sink. These are easy for anyone to replace using our simple, fast and secure 'SafeLock' system.

We offer a dedicated filter reminder service – we'll send you a reminder by email each time your filter is due for renewal.

Filters are easy to buy as singles or packs from **www.abode-shop.co.uk** when the time comes to replace.

It's important to change the filter at the recommended intervals to ensure the consistency of the supply of fresh, filtered drinking water.

Usage:

The capacity of the filter for Aquifier and Swich products vary, these range between 1000L and 6000L (dependent on incoming water quality and usage).

We have both Classic and High Resin filters available, specifically tailored for use in soft water or hard water areas respectively.

If you live in a soft water area the filter will be used up much slower than one in a hard water area (based on a standard average usage).

We recommend that our filters are changed every 6 months on average. If you live in a hard water area or have a higher filtered water consumption, replacements every 3-4 months may be beneficial.

swich

A revolution in filtered water technology

How does a Swich product work?

- Convert **ANY** kitchen tap to one which delivers filtered water as well as the standard cold water supply.
- The easy way to get filtered water from any style of tap.
- Simple to install either through the worktop, or any standard sink 35mm tap hole or even in the sink cabinet.
- Easy to use, just turn to divert to the filtered water function and back again to the standard cold water supply.
- Can be installed alongside a new tap or retro-fit with an existing tap.
- Award winning, unique product design.

MAKE THE SWITCH FROM BOTTLED WATER, SAVE MONEY AND THE ENVIRONMENT

Features & Benefits

- **Transforms Any Tap.** Converts any existing tap into a filtered water source.
- **Better-Tasting Water.** Improves flavour, clarity, and quality by reducing impurities.
- **Compact & Discreet.** Designed to integrate effortlessly into any kitchen setup.
- **Reduce Single-Use Plastics.** One Swich filter replaces up to 8,000 1L plastic bottles.
- **Cost-Effective.** Save money on bottled water while reducing environmental impact.
- **Easy Install.** Only requires a standard 35mm hole.

Introducing the Click Handspray, available in 6 colourways.

This collection allows you to enhance your kitchen with added functionality and will pair perfectly across a broad selection of boiling water taps.

The ergonomic clicker button promises durability and ease of use to make light work of cleaning and cooking tasks.

Warranty

Comprehensive Warranty

In the unlikely event that you should experience any defect in the materials or workmanship of your new

- **Abode sink within 10 years of purchase**
- **Abode tap within 5 years of purchase**
- **ProBoil boiler within 2 years of purchase**

The purchaser's sole remedy shall be the replacement (at the manufacturer's discretion) of all or any part of the product that is defective.

For the tap, all working parts and valves are guaranteed for a period of 5 years from date of purchase. Decorative surface finishes and O-rings are guaranteed for 1 year from the date of purchase provided that our advice concerning care has been observed and no scouring agents have been used.

This is provided that the sink, mixer or tap has been used for normal domestic purposes and that the care, installation and maintenance instructions have been observed. The warranty extends to the original purchaser only.

Customer Care

Caution

Repeated release of boiling hot water directly into coloured sinks can in extreme cases cause crazing and even cracking. Therefore we recommend great care is taken not to release the water directly on to the sink surface at full temperature for extended periods.

Water Regulations

All products should be installed in accordance with Local Water Bye Laws.

Visit **www.abodedesigns.co.uk** to search all products with a current WRAS approval.

Our ProBoil boilers store water at a maximum temperature of 98°C to conform to UK legislative limits. Spout exit temperatures will vary according to environmental changes and usage patterns.

Technical Support

Choosing the right mixer tap and sink for your home is an important choice as the tap is not only the most architectural item in your kitchen, but also the most used.

Think about the style you require, the ease of use you are looking for, and then consider your existing water supply and the water pressure available to you. If you have any questions with regards to whether a tap will be suitable for your application, please contact our technical support team or visit our website www.abodedesigns.co.uk for more details.

For sinks, consider the material and colour you prefer, the uses of the sink, the number and bowl sizes, the type of worktop material you propose to use and the base unit space available to install within.

Your long-term satisfaction with the product is important to us. In the event that you require spare parts for your Abode product, please contact our technical support team or visit our web site for further technical information.

Scan to visit our YouTube channel for support videos.
