

CLIO™

PLANNER

A powerful new planning tool that makes light work of complex BC planning

An efficient and effective Business Continuity planner with low operating and maintenance costs

CLIO Planner is an IT-based Business Continuity planning system that allows you to understand the risks associated with your business, conduct risk assessment and BIA and then create, test and review response plans.

CLIO Planner is highly intuitive, requires a minimum of familiarisation, training and practice and can easily be tailored to suit the needs of any business. It is also simple to modify, adapt or expand.

CLIO Planner will help you:

- Understand the risks within your organisation
- Conduct an accurate Business Impact Analysis
- Create plans to respond to the identified risks
- Test and review plans
- Create a sustainable Business Continuity Management programme

All plans created in CLIO Planner can, if required, be quickly activated through the CLIO Manager crisis management system.

We design the planner, you do the planning

badgersoftware

Simplify business continuity planning with CLIO Planner, a new product in the suite of CLIO IT systems from Badger Software

Minimises effort, maximizes the result

CLIO Planner is designed to run with the minimum of manpower and at low operating and maintenance costs. It assists you in setting up and collecting information from facilities, locations, business processes, departments and stakeholders and then helps to collate, prioritise and manage this data.

You remain in control

The system is designed so that it can easily be tailored to suit the needs of any business allowing the user to maintain full control and it is simple to adapt or expand as requirements change.

CLIO Planner offers many advantages over contemporary planning systems

Ease of use

Integrates with standard proprietary software such as WORD and EXCEL so is highly intuitive and needs a minimum of training and practice.

Flexibility via system option settings

Choose how to run your business continuity system by setting options to manage risk assessment and planning.

Business Explorer tree view

Your organisation structure and continuity planning is represented graphically, with colour highlighting of processes, risks and plans.

Status Dashboard

Key performance indicators are shown graphically and with the ability to drill through directly to the Business Explorer for efficient attention to problem areas.

Plan Test scheduling

The system prompts you for plan exercising and testing based on your organisation's scheduling requirements.

Remedial Actions

Assign actions to individuals to manage preparatory and remedial workflows related to your continuity planning and testing.

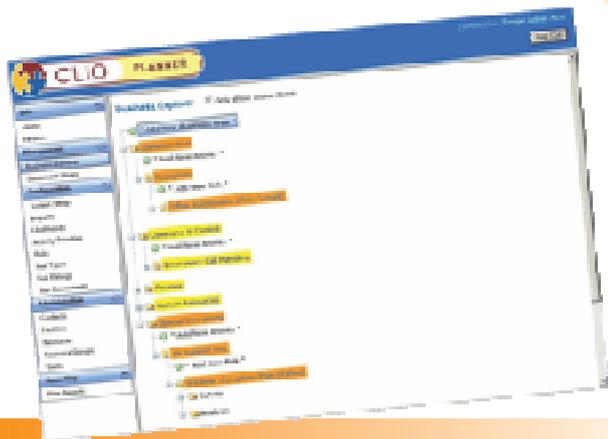

Resource Library

Build your own document depository to store key company documents about your business continuity strategy and planning.

CLIO Planner can, if required, be fully integrated with CLIO Manager, the UK's leading critical incident management system.
