\* In-Foal Fee

£120 -for all mares visiting or residing at the stud scanned in foal to fresh/chilled semen. This fee includes all the handling associated with the veterinary work. If a mare leaves before being scanned it will be assumed that she is in foal and the fee is payable before she leaves the stud. If however she is found to be not in foal by October 1st and this is confirmed by a vet's certificate, 50% of the fee will be returned.

## Other Notes

The Stud reserves the right to charge an additional hay/feed levy in the event of extreme weather or where additional feed is considered to be in the horse's best interest.

All Stabled, full livery horses, are allocated 3 bags of bedding per week. Any additional bedding used will be charged at the current rate.

It is the stud policy to scan mares at 15 and 28/30 days post insemination to confirm pregnancy and heart beat. However if the mare leaves before the 28/30 day scan it is the owner's responsibility to ensure this is carried out.

All foals will receive regular handling and feet trimming.

An additional charge may be applied for handling difficult mares due to the number of people involved.

Charges are subject to review on 1 April and 1 October each year and may also change within that time due to the global cost of feed/bedding.
