MANNINGTREE TOWN COUNCIL

Manningtree Town Council carried out extensive testing using the SiteImprove Accessibility Checker on its new website. Several pages were checked and any issues not falling under the disproportionate burden clause dealt with by the council's website developer Webfactory. In addition, the clerk has manually tested several pages in terms of:

- Changing colours, contrast levels and fonts
- Zooming in up 300% without the text spilling off the screen
- Navigating most of the website using just a keyboard
- Navigating most of the website using speech recognition software
- Listening to most of the website using a screen reading (including the most recent versions of JAWS, NVDA and VoiceOver)
