

PRINCE2 PRACTITIONER

PRINCE2 (an acronym for PProjects IN Controlled Environments) is a process-based method for effective project management that guides staff through the essentials for running a successful project. Easily tailored and scalable for the management of all types of projects in any organisation or industry, the method is the de-facto standard for project management in the UK and is practiced worldwide.

This PRINCE2 Practitioner course will further develop the skills and competences that candidates acquired in their Foundation qualification, teaching them to apply the theory and tune PRINCE2 to address the needs and problems of each specific project scenario.

WHO SHOULD DO THIS COURSE:

- New and experienced project managers
- Consultants and contractors operating in a project environment
- Project board members
- Team managers and support employees
- Operational and general managers
- Programme managers

COURSE OUTCOMES INCLUDE:

- Learning how to manage projects and work in a project environment
- Benefiting from a thorough understanding of the language and approach to PRINCE2 projects
- Producing a detailed explanation of the seven principles, seven themes and seven processes of PRINCE2 and their application in context
- Demonstrating an understanding of the reasons behind the PRINCE2 methodology and the principles underpinning its elements
- Designing plans and reports to meet the needs of each level of the project team and project board, improving communication and control
- Facilitating the assurance and assessment of project work, troubleshooting and audits
- Demonstrating their ability to tune PRINCE2 to different project circumstances
