<b>Notes</b>	<p>The level of disability was asked for each individual as part of the 2011 Census. This is therefore self-reported disability, rather than clinically assessed. However, there is no financial or social reason for the answers to be biased.</p> <p>The question asked was “Are your day-to-day activities limited because of a health problem or disability which has lasted, or is expected to last, at least 12 months?”: Answer choices were “Yes, limited a lot”, “Yes, limited a little”, or “No”.</p> <p>There were 8 questions between this and the self-reported health question (used in More Metric data 30009) and therefore it might be considered they were answered independently.</p>
