

1 Always read the product label and follow the instructions for use. Always add the product to the water.

2 Always use the appropriate personal protective equipment (PPE).

3 Never mix products. Mixing products may cause a chemical reaction which can produce gases which could be hazardous.

4 Never put products into an unmarked container. Ready to use labels should be provided. If not, ASK.

5 Never put products into bottles or containers with other uses, i.e. water or drink bottles.

6 Know where to find your Safety Data Sheet. Know who your first aider is and how to contact them.

7 Ensure all products are stored correctly. Keep chemicals away from children.

8 Always report any faulty equipment, spills or damaged containers to your supervisor.

9 Know and follow your company's standard operating procedures and follow safe working practices.

10 If you notice anything in your workplace that you think is unusual or dangerous report it to your supervisor.

Control Of Substances Hazardous to Health
