

How To Use Nanolex WashCoat

This product can be stored for up to 24 months (in a dry, temperature stable environment)

Processing temperature: 3-30°C - Avoid direct sunlight.

IMPORTANT: Before you use a Nanolex Car Care product please make sure you wear suitable protection gear – we always recommend to use Latex- or Nitril gloves to make sure your hands are protected from any possible damage to your skin.

Nanolex WashCoat can be applied to all exterior surfaces. The surface **must be wet and free of contamination.**

Apply WashCoat only to wet surfaces, preferably after washing the car, when the car is still wet. Nanolex WashCoat should be applied by using a foam lance or a pump sprayer. Only dilute Nanolex Washcoat immediately before using it. Use 50-100ml for an initial application and 20-50ml for maintenance solved in 500ml of water. Spread all of the solution evenly on the surface and let it sit until the foam has built droplets and settled on the surface. Rinse after a maximum of 3 minutes using a pressure washer. Make sure that all residue is removed properly. Dry the car carefully, using a soft, plush towel.

Nanolex WashCoat is fully cured by the time you rinse it.

Please read the separate information on how to clean your car after a treatment with Nanolex sealants.

If you have any questions regarding our products or in case you need support during the application please feel free to get in touch with our staff any time.
