

COMPANY ENVIRONMENTAL POLICY

In introducing our Environmental Policy the Group recognises that it has a responsibility to the environment and we will take all positive steps to address the environmental impacts of our business operations. We will seek to minimise our adverse impacts through good management, aiming for continuous improvement in our environmental performance.

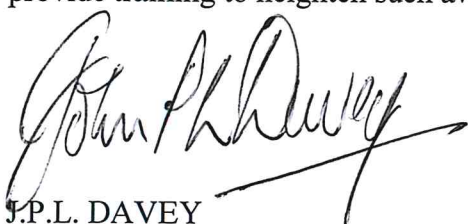

The scope of Cargo Services UK's Environmental Management Policy embraces the following operations and activities:-

- ❖ Ship loading and unloading
- ❖ Road transport operations
- ❖ Railway operations
- ❖ Warehousing
- ❖ Engineering services, to vehicles and plant
- ❖ Timber manufacturing services
- ❖ All office activities
- ❖ Port security
- ❖ Waste management, including ship waste
- ❖ Ships agency

In recognition of the principles of the European Sea Ports Organisation's Environmental Code of Practice, the main objectives of this Policy are:

1. Reduce to a minimum the environmental impact of its activities, seek ways to conserve natural resources and continually strive to improve its environmental performance.
2. Use energy and water efficiently and optimise our use of natural resources.
3. Meet or exceed the requirements of all applicable legislation and Port industry best practice.
4. Reduce or eliminate the production of polluting releases to the environment by using the latest and newest technology and engineering solutions.
5. Reduce waste and the use of natural resources through consideration of the environmental impacts of purchasing decisions.
6. Manage waste effectively through a programme of improvements to existing control systems.
7. Where relevant, assist governmental and local bodies to develop solutions to pressing environmental problems.

To implement this policy, Cargo Services will ensure that its staff and contractors are fully aware of these commitments, and of the need to assess and monitor the environmental implications of activities within their areas of responsibility and we shall, if necessary, provide training to heighten such awareness.

J.P.L. DAVEY
