

Part of

Using Speed Mode in the Animal **Proagrica** Logger application on the Workabout Pro (Psion)

- 1. Assumptions: The Psion has been setup using the Farmplan program including sending out correct actions for the day/weeks activities. In this example they have sent over the action of 'Scan (no/days)' ready for PD scanning but please select the required action that you are using.
- 2. Open the Animal Logger program & select Speed Mode

3. Click Select Actions

4. Tick the action you require - in this example 'Scan', then click SAVE

5. To start, select 'Read Tag to select' OR 'Find Animal' if not using the aircap reader

4	Animal Logger 🛛 🚯 ដ 🕂 🕂 💷 13:20
	Speed Mode
	Select actions
8	Read tag to select
	G Find Animal

6. The screen will present and give you the option to click 'Scan Tag' OR you will be presented with a list of your animals from which you can search for the correct animal.

7. Because you have previously selected the action of Scan it gives you this option – fill in the corresponding boxes, once complete click 'OK'
