Employee Net Deduction - based on Banded Earnings

An Employee Net Deduction is deducted from the employee's pay after Tax and NI is calculated, then the employee receives basic rate tax relief on that pension deduction; for tax year 2014/15 the rate is 20%. Higher rate tax payers need to claim the remaining tax relief from HMRC. This method of deducting pension contributions HMRC call relief at source (RAS).

In payroll, if say the employee's pension deduction is 1%, you would enter 1% in the employee's pension deduction standard value but the actual deduction will be 0.8% from their pay.
