

# AUSTRALIA'S SULPHATE OF POTASH REVOLUTION

In the barren depths of Western Australia's outback, rival developers are racing to be first to produce and market sulphate of potash fertilizer drawn from the region's dry, brine-rich lakebeds. This infographic explores the competing companies' claims, transport links, offtake agreements, and logistical challenges.

- Claim
- Estimated SOP resources
- Route to market
- Chosen process
- Offtake agreements
- Major ports

# ICIS FERTILIZER MARKET INTELLIGENCE

## THE MARKET

A **weekly fertilizer report** built for the international global fertilizer business, giving you the global and complete view of the market
