

# RGGI Portal

Helping you to identify risks, interpret market developments and anticipate price movements

The **ICIS RGGI Portal** is a blend of qualitative analysis and a suite of inputs and outputs from ICIS' Timing Impact Model (TIM), including price forecasts, fundamental data and company-specific behavior data.

## Expert carbon analysis giving you a market advantage

The **ICIS RGGI Portal** gives you an advantage in the market by helping you identify risks and understand what drives participant behavior in the RGGI market.

Our team of expert analysts understands better than anyone the way you need to digest information. In addition to providing the inputs and outputs of the TIM to subscribers (that you can feed into your own analysis), we also explain what the data means. Our team of analysts are also available by email, phone or instant message to answer your questions.

We shine a light on why the market moves, what drives these movements and what to expect in the future. This is why we're the go-to source for the RGGI market.

The **ICIS TIM** (Timing Impact Model) is a unique modeling technique which captures utility hedging rates and banking behavior of industrials. It forecasts the true market balance, enabling you to better understand the risk exposure of your trades and to trade ahead of the curve.

## The RGGI Portal solution gives you:
