

WCI Portal

Helping you identify risks, maximize profits and justify trading decisions

The **ICIS WCI Portal** is a combination of qualitative and quantitative analysis for the linked carbon market between California, Ontario and Quebec. Our ICIS experts in the US produce price forecasts, offset data and behavioural data.

Expert carbon analysis giving you a market advantage

The WCI Portal helps you identify risks and understand what drives participant behavior in the California, Quebec and Ontario cap-and-trade markets.

Our team of expert analysts understand better than anyone the way you want to view information, because they've been there. We just don't give you inputs and outputs from our the **Timing Impact Model**. We also explain what that data means and how it could impact the market.

But we don't leave it there. Our team are always available to customers to answer questions and talk through ideas.

The **ICIS TIM** (Timing Impact Model) is a unique modeling technique which captures utility hedging rates and banking behavior of industrials. It forecasts the true market balance, enabling you to better understand the risk exposure of your trades and trade ahead of the curve.

The WCI Portal solution gives you:
