

# EU ETS Insight

## Analysing the impact of carbon market news

EU ETS Insight provides the highlights of ICIS European behaviour-driven carbon market analysis. Our analyst updates and monthly briefings explain the market impact of news, policy announcements and trading statements – helping you make informed decisions and saving you time. Furthermore, the Insight product also features a price forecast and market analysis.

## Expert carbon analysis giving you deeper insight

We provide a robust view on why the market has reacted the way it has and how it will react in the future. Our analysts understand how crucial it is for you to have accurate and concise information you can absorb quickly, so we don't overload you with information. Critical updates

are bullet-pointed and released right after breaking events. The ICIS EU carbon analyst team have worked for utilities and trading houses, which ensures you are getting executable analysis you can trust.

## The EU ETS Insight solution gives you:
