॥ Sirrus®

DECISIONS IN MOTION.

Your solution to in-field mobility.

Farming occurs in the field, not the office. Manage data collection anytime, anywhere using Sirrus®. It functions with or without wireless service and seamlessly syncs to other agX® platforms.

MOBILITY

Create insights that increase profits and reduce risks. Generate advanced site-specific information across fields while in-field! Capitalize on the value of in-field management and increase the economic value of every acre using Sirrus.

COMMUNICATION

Communication, accessibility, and convenience are important to service providers and growers. With Sirrus, sales agronomists can place information directly into the hands of growers.

STANDARDIZATION

Standardize your data collection using agX compliant picklists. Our standardized picklists keep data consistent, help train new employees, or speed up the day for a seasoned agronomist.

CENTRALIZATION

Maintain and sync activities easily, and access data anytime, anywhere. Sirrus integrates with any agX compliant application for a seamless sharing experience. Let Sirrus become the center of your precision agriculture program.

PRECISION

By using precise management zones in Sirrus, you have the ability to make effective variable rate application decisions. Sirrus has what is needed for intensive programs so you can make informed fertility decisions.

REPORTING

Sirrus puts decision-making reports in your hands. PDF reports can be customized with an organization's logo and emailed directly to the client.
