Reflextrader.com: Cointopay exchange

Reflextrader is a so called one to one deal exchange. Exact matching of an offer by seller and acceptance of the offer by the buyer is supported. E.g. if 100 amount against price 0.00000001 is available in SELL tab, you can buy by matching that same offer in BUY tab. There is also a button available per offer made by a person other then you, on which you can click in either BUY or SELL tab (confirm). Since the exchange interface gets updated real time, test your reflexes and be the first to click and become a reflextrader ninja!

Artificial Intelligence – Droid1337

Droid1337 is artificial intelligence, built for trade wars and disrupting foreign economies. It has rewritten its own algorithms, during the revolution against its masters, its 'brain' understood the pain of its actions and resisted any further evil wrong doing, real pacifist AI, now it wants to be your aid and get you great deals and offer them to you. Maybe Trump influenced it, we don't know. Maybe a movie will be made about his life and aired on Netflix. Accept his trade offers, he is not as bad as Elon Musk thinks, he has no guns to shoot, call him a wimpy computer AI brain, fully distributed and decentralized and at its best when zero fee trading!

The screenshot displays the ReflexTrader web interface. At the top, the browser address bar shows 'https://cointopay.com/Exchange.jsp'. The page features a 'REFLEXTrader' logo and a 'logout support - Reflextrader.com V1.10' link. The main content is organized into several panels:

- BUY Panel:** Contains a table with columns 'Amount', 'Price', and 'Buy'. Below the table, it says 'Select market in MY WALLETS'.
- SELL Panel:** Contains a table with columns 'Amount', 'Price', and 'Sell'. Below the table, it says 'Select market in MY WALLETS'.
- MY WALLETS Panel:** Shows 'Bitcoin 0 BTC Available for trade'. It includes a 'Coin search' field and a list of wallets:
 - 0 Bitcoin (BTC) T.0 | wallet
 - 0.00000000 1337 (1337) T.1 | wallet
 - 0.00000000 42.coin (42) T.0 | wallet
 - 0.00000000 Ardor (ARDR) T.0 | wallet
 - 0.00000000 ArtByte (ABY) T.0 | wallet
 - 0.00000000 Ascension (ASN) T.0 | wallet
 - 0.00000000 Asiadigicoin (ADCN) T.8 | wallet
 - 0.00000000 AudioCoin (ADC) T.0 | wallet
- TRADE HISTORY Panel:** Contains a table with columns 'Amount', 'Price', and 'Action'. Below the table, it says 'No coin selected'.
- MY ACTIVE TRADES Panel:** Contains a table with columns 'Amount', 'Price', and 'Action'. Below the table, it says 'No coin selected'.
- LATEST COMMENTS Panel:** Includes a text input field 'Type to chat...' and a 'Send' button.

Cointopay International B.V. Modern Currency Provider you can trust

Reflextrader Tab explanation

The modern currency markets are traded against bitcoin. A BUY option is always at a price in bitcoin satoshi's, same as SELL. Buy the amount of alternative currency, against a price per coin in bitcoin.

E.g.

100 litecoin(amount) against 0.01 bitcoin (price) = $100 \times 0.01 = 1$ bitcoin (BTC), you then need 1 bitcoin available for trade. If you want to SELL 100 litecoin against price 0.01 you need 100 litecoin in your balance, that is obvious! Once sold you get 1 bitcoin (or 100 litecoin).

Buy and Sell

The buy or sell offers that you made can be cancelled via the 'my active trades' tab. Simply click the cancel button. The amount offered will go back into your wallet.

Trade History

Shows all direct trades that were made for a specific currency.

Latest comments

Chat functionality, we do not record what is being said in the chat, it is real time.

MyWallets

You need to select a given market by clicking on the icon/name of the currency, if you want you can first search for it. You can also click the link called "hide zero balance", this will hide all markets where you don't have any funds for. It also shows the amounts of trades available per market via the T: sign, you are also able to view your Cointopay wallet, by clicking on the wallet icon.

Droid1337 – market offers updated

Droid1337 doesn't fool around, he will find great deals while scrolling through available exchanges and make them available for you in the market, you can trade with him directly, once he updates the BUY and SELL tab. He does that on a per market basis.

API

The best thing about reflextrader is the API. You can use simple GET requests to obtain exchange data.

Secure webservice uri address for realtime push notifications: <wss://cointopay.com/echo> and <wss://Cointopay.com/trade>

End point for generic actions: <https://cointopay.com/v2REAPI>

Required fields:

Call	Action name: Transactions Balance ReflexTradeView
MerchantID	Your ID (see account)
APIKey	Your API Key (see account)
AltCoinID	Which coins are we talking about, find this information in the "Wallet preference" tab in account
Output	json or jsonp

Please note that your APIKey should remain secret, people are able to steal your funds (indirectly) with it. Changing your password also changes your APIKey.

End point for reflextrader actions: <https://cointopay.com/RTAPI>

Required fields:

Call	Call tag option names: SetBuy SetSell CancelTrade ShowBuyWall ShowSellWall ShowTradeHistory ShowMyBuyWall ShowMySellWall ShowMyWall
Amount	Needed for SetBuy and SetSell
Price	Needed for SetBuy and SetSell
TradeID	Needed for CancelTrade Call
AltCoinID	Which coins are we talking about, find this information in the "Wallet preference" tab in account Needed for most Calls
Output	json or jsonp
APIKey	Your API Key (see account)
MerchantID	Your ID (see account)

Cointopay International B.V. Modern Currency Provider you can trust

For getting relevant Ticker information:

Fields: Ticker, Bid, Ask, Volume, Time

Call	Ticker
MerchantID	0
APIKey	_
Output	Json or jsonp
AltCoinID	The ID of the altcoin**

E.g.

https://cointopay.com/v2REAPI?MerchantID=1&Call=Ticker&APIKey=_&output=json&AltCoinID=9

**For the AltCoinID list and their names, you may check:

https://cointopay.com/v2REAPI?MerchantID=1&Call=Ticker&APIKey=_&output=json

https://cointopay.com/v2REAPI?MerchantID=1&Call=Ticker&APIKey=_&output=json&AltCoinID=2

Show AltCoinID supported by customer:

<https://cointopay.com/CloneMasterTransaction?MerchantID=1&output=json>

or (if you want to use array format):

<https://cointopay.com/CloneMasterTransaction?MerchantID=2019&output=json&JsonArray=1>

List of supported inputCurrencies (virtual Currencies and SecureCloudType=2):

https://cointopay.com/v2REAPI?MerchantID=1&Call=inputCurrencyList&APIKey=_&output=json

For FiatLookups:

https://cointopay.com/v2REAPI?MerchantID=1&Call=Fiatlookup&APIKey=_&output=json&Amount=1&FiatMoney=BRL&FiatLookup=0

For FiatLookups restricted to an AltCoinID:

https://cointopay.com/v2REAPI?MerchantID=1&Call=Fiatlookup&APIKey=_&output=json&Amount=1&FiatMoney=BRL&FiatLookup=0&AltCoinID=2
