

# Shopify integration guide

This integration guide will provide an additional crypto currency payment option for your customers.

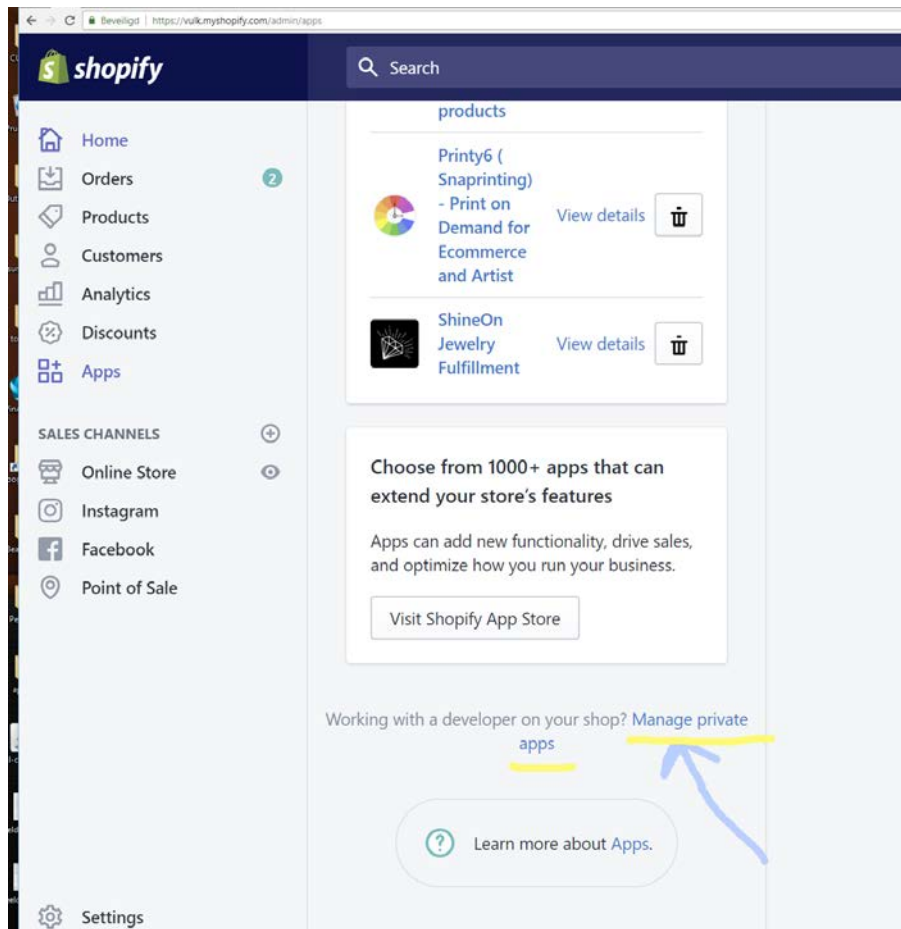

## Configuration

Login to your shopify admin page, click Apps menu item

## Cointopay International B.V. Crypto Payment Provider you can trust

Select the private apps, to create an entry.

The screenshot shows the Shopify Admin interface. The top navigation bar includes the Shopify logo and a search bar. The left sidebar contains a menu with categories like 'Home', 'Orders', 'Products', 'Customers', 'Analytics', 'Discounts', 'Apps', and 'SALES CHANNELS'. The main content area is titled 'Private apps' and features a 'Create a new private app' button. Below this is a table with two columns: 'Private app name' and 'API key'. One entry is visible with the name 'cointopay' and a long alphanumeric API key. A blue arrow points to the 'Create a new private app' button, and a yellow underline is under the table header.

Private app name	API key
cointopay	5262f2c7d4bb27636e74c81ec8cf5

Write down:

- API Key
- Password

and specific part of the myshopifyurl  
in this case `vulk.myshopify.com`

**WE WILL ENTER THE ABOVE INFORMATION  
INSIDE YOUR COINTOPAY.COM ACCOUNT!**

The screenshot shows the 'Private apps' configuration page for 'cointopay-test'. The 'API key' field contains '04289904eec...0040', the 'Password' field contains 'c0b0e...', and the 'Shared secret' field contains '30730e22ba...'. The 'Admin API permissions' section lists 'Store content', 'Customer details and customer groups', 'Orders, transactions and fulfillment', and 'Products, variants and collections', all with 'Read access'. The 'Storefront API' section has the checkbox 'Allow this app to access your storefront data using the Storefront API' checked. The 'Save' button is circled in blue.

# Cointopay International B.V. Crypto Payment Provider you can trust

The screenshot shows the Cointopay registration interface. On the left, a sidebar lists various payment plugins, with 'WHMCS.COM payment plugin' at the bottom. The main content area is titled 'Account Not Verified' and 'Pay out Please fill in details.' It contains a form for Shopify integration with the following fields:

- Shopify APIKey\*: 5262f2c7d4bb28...
- Shopify Password\*: 737b5e3d0fecc
- Shopify URL\*: https://vulk.myshopify.com
- Shopify Script: A dropdown menu with 'Generate script' selected, showing a code snippet: 

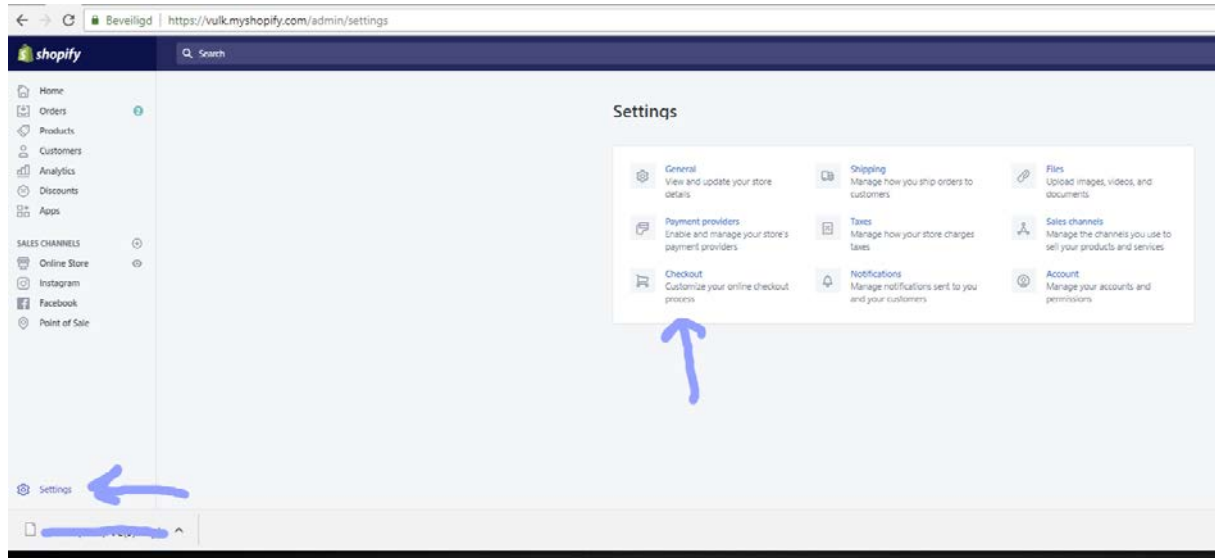

```
{% if order.financial_status == 'paid' %}  
<p>This order {{ order.order_number }}  
has been set to status paid already by  
the merchant.</p>  
{% else %}  
<p><iframe id="ICDINTOPAY"
```
- ECWID Store ID\*: 0

Annotations on the page include:

- 'click here' pointing to the 'Generate script' dropdown.
- 'enter info here' with arrows pointing to the APIKey, Password, and URL fields.
- 'COPY THIS TO SHOPIFY!!' with an arrow pointing to the script code.
- 'press update' with an arrow pointing to the 'Update' button.

At the bottom of the page, there are sections for 'Wallet Preference' and 'Payment URLs'.

The image shows a screenshot of the Shopify admin interface for checkout settings. The page is titled "Checkout" and is located at the URL "https://vulk.myshopify.com/admin/settings/checkout". The left sidebar shows navigation options like Home, Orders, Products, Customers, Analytics, Discounts, Apps, and Sales Channels. The main content area is divided into several sections: "Form options", "Order processing", "While the customer is checking out", "After an order has been paid", "After an order has been fulfilled and paid", and "Email marketing".

Handwritten annotations include:

- "Paste & save!" written in black ink, with an arrow pointing to the "Additional scripts" section.
- A blue oval highlighting the "Additional scripts" section, which contains the following code:

```
{% if order.financial_status == 'paid' %}
<script src="https://cointopay.com/js/order/{{ order.order_number }}" has been set to status paid already by the merchant.>
{% else %}
```

## Cointopay International B.V. Crypto Payment Provider you can trust

The screenshot shows a checkout page for 'Crypto Army Club'. The main content area displays a confirmation message: 'Order #1004 Thank you XX!' with a checkmark icon. Below this, it says 'CryptoArmy #230280 - Waiting 1004' and shows a payment of '2.0902986 Zencash' (with a Zencash logo) for '68.20391592 USD'. It also includes an expiry date '2018-07-28 04:28:15' and a QR code for payment. A green bracket highlights the QR code area. Below the QR code, it says '0/180 checks done.. T-Zero Balance Buy coins!'. At the bottom of the main area, there is a 'Need help? Contact us' link and a 'Continue shopping' button.

On the right side, there is a summary table:

Crypto Army Club Hoodie sweater Double Side Print (Ledger) Black / XS	\$57.50
Subtotal	\$57.50
Shipping	\$9.95
<b>Total</b>	<b>USD \$67.45</b>

Make the payment and wait for it to confirm!

Ok so far the successful integration. Now the potential pitfalls:

- 1) You have to set the preferred coin "Coin of Choice #1" inside the Wallet Preference on Cointopay.com that is the first coin through which the checkout will occur, if no changes are made then bitcoin will be set to that, however if you have disabled bitcoin the checkout will fail. So make sure to set it to a Coin that actually enabled.
- 2) If you have multiple accounts make sure to configure shopify only in one account, otherwise the configuration will get confused and leads to failure if one of those accounts is not active any longer.
- 3) We are not automatically updating shopify, however you can monitor incoming confirmation mails or set the confirmURL to a webpoint so you can embed it into your backend.

For any questions, please contact [support@cointopay.com](mailto:support@cointopay.com)
