

UTILITY TRIAL HOLES

Phoenix Road

What are we doing?

As part of developing the route design of the HS2 high speed railway, we are carrying out utility trial holes surveys on **Phoenix Road** during May.

The surveys will involve temporary holes being dug which will enable us to establish where utilities and services are located beneath the road surface. Please visit www.HS2inCamden.co.uk and sign up for news alerts for any updates or date changes.

How will this affect you?

Two temporary trial holes will take place on **Phoenix Road** from **12 to 31 May**. The working hours and location map are set out in the right column.

For the duration of the works the following traffic management measures will be in place:

- There will be a footpath closure adjacent to the Avis Garage
- There will be a partial road closure and parking bay suspensions near the Fine Tutors centre, the footpath will remain open
- There will be traffic and pedestrian diversion signs in place

The initial digging/breaking out of the road will be the noisiest activity, although this will be intermittent and not continuous. We will erect screening clad with acoustic panels to reduce noise. We will work as quickly as we can and keep road closures to a minimum. We will keep our work area tidy.

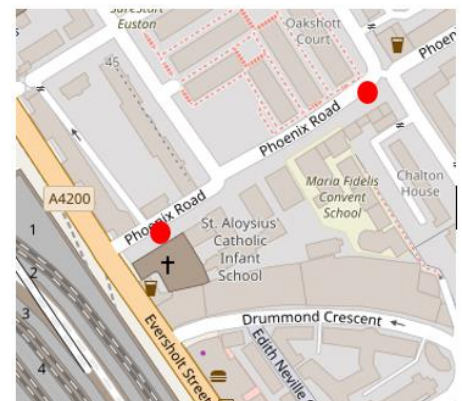

There will be no disruption to utility services as a consequence of these works. We recognise the disturbance this work can create and apologise in advance.

Duration of works

- Phoenix Road from **12 to 31 May**
- Normal working hours: Monday to Friday 8am-6pm, Saturdays 8am-1pm
- Our contractors may also be on site for an hour before the start and/or at the end of each shift

What to expect

- Traffic management measures will be in place
- The footpath will be closed next to Avis Garage
- Part of the road will be closed and parking bays suspended by the Fine Tutors centre
- The sites will be secured with construction fencing
- Acoustic panels will be used to reduce noise
