

# NOTICE OF GROUND INVESTIGATION SURVEYS

## What are we doing?

As part of developing the route design of the HS2 high speed railway, we are carrying out ground investigation surveys on **Harvil Road** which are anticipated to start on the weekend of 4-5 November. Two pavement cores will be drilled and the work will take approximately one day between 8am and 1pm.

This type of survey helps us to understand more about the ground where we want to build the railway. It is important that we know about the soil before construction begins so we can build effectively. If you'd like to know more, please visit [www.gov.uk/hs2](http://www.gov.uk/hs2) and download our ground investigation guide.

## How will this affect me?

The work will involve a small piece of concrete being cored from the road and sent for examination. This method typically requires one person and can usually be completed in a matter of hours. Traffic management will be put in place during these works.

Our contractor will work as quickly as they can, avoid unnecessary noise and keep the area tidy. Once the work is complete, our contractor will restore the area to its previous condition. We apologise in advance for any inconvenience that this may cause.

For more information on about what the proposals are for the route as it travels through the London Borough of Hillingdon, how it is being constructed and what we are doing to make this less disruptive, please visit: <https://hs2inhillington.commonplace.is/>

## Duration of works

- Weekend working hours
- Working hours between 8am and 1pm
- Our contractors may also be on site for one hour's start-up and shutdown.

## What to expect

- Background noise from pavement coring
- Traffic management in place
- Contractor vehicle movements to and from site.

## What we will do

- Inform you in advance of any changes to the dates shown
- Keep all sites safe and secure
- Ensure that all sites are reinstated to the required standard.
