

Affinity Water works update

November 2018 | www.hs2.org.uk

High Speed Two (HS2) is the new high speed railway for Britain. Affinity Water's contractors are laying a new pipe in the fields to the north and south of the Chiltern line to divert the west London mains water connection.

Current work

Work continues to take place at two sites in Breakspear Road South, one to the south and one to the north of the Chiltern line. This ongoing work involves digging trenches and laying the new pipe.

The work has also involved creating two shafts at both sites at a depth of 10m to bore a tunnel so that the new pipe can go under both the Chiltern line and the future HS2 route.

Concrete pouring

The work on the shafts will require work for a **24 hour period** from **Monday 3 December to Tuesday 4 December** at the northern site and create a concrete plug at the base of the shaft.

To create this plug the work will involve pumping 175m³ of concrete, which has to be poured continuously for it to set properly. The work will involve a mobile concrete pump at the site, lighting, a mobile crane and concrete lorries arriving and leaving throughout the 24 hour period.
