Ground investigations at Ruislip Golf Course

February 2019 | www.hs2.org.uk

High Speed Two (HS2) is the new high speed railway for Britain. As part of developing the route design of the HS2 high-speed railway, we are carrying out further ground investigation surveys in your area. The results will build on the information we already have from work done in 2017, helping us get a better understanding of the ground conditions and underground building foundations.

What are we doing?

We will be carrying out ground investigations work in the hoarded area to the south of Ruislip Golf Course from 4 March for four weeks. This will involve drilling a shallow bore hole and digging a number of small observation pits in the immediate area to better understand the ground conditions in the area. The approximate location of the survey is shown below.

Approximate location of the ground investigation work

There will be some noise during the hours listed in the panel to the right; the site will be surrounded by protective barriers and acoustic screens to help reduce this. We will make the working area as small as possible without compromising safety. Pedestrian access will be possible at all times during the works. These dates may change due to unforeseen circumstances. We will keep you informed about any changes. To sign up for news alerts please visit hs2inkilburnandnortholt.commonplace.is
