

Release Notes

ClearDB Documenter 5.0.1 (build 423)

IMPROVEMENTS

- **Docu Manager**
 - Renamed commands on the *Docu* Manager pop-up menu.

BUGS FIXED

- **Docu**
 - Clicking a link to a valid object no longer triggers a confirmation message to clear the filter.
 - Links to invalid objects now work correctly.
- **DB Connection Window**
 - Oracle Net Service Names are now retrieved correctly from the OpenLDAP server.
 - Text entered after a quotation mark (") in the user name is now lowercased.
- **Docu Options**
 - The "Docu at a Glance" page now opens correctly in the Preview mode.
 - It is no longer possible to create a preview of a *Docu* when "Skip connection" is enabled.
- **DB Object Tree**
 - The "Processing History" button now becomes available after a *Docu* is generated.
- **Docu Summary Report**
 - Summary reports now open in the predefined browser, not only in *docuVIEWER*.
- **Job Manager**
 - An access violation no longer occurs on opening the application after working in the Job Manager.
- **Template Manager**
 - Viewing content of a template no longer causes a script error.
- **Docu Manager**
 - Source *Docus* are now correctly shown for *Docu* Comparison Reports.
- **GUI**
 - Fixed the layout of the UI elements on the Security Audit tab when 125% DPI or higher is applied.
