

Release Notes

ClearDB Documenter 5.0.1 (build 427)

IMPROVEMENTS

- **Code Analyzer**
 - SELECT statements including with_clause and plsql_declarations_clause are no longer ignored by the analyzer.
- **Docu Manager**
 - The “Reset Columns to Default” option now resets the columns’ sorting to default as well.

BUGS FIXED

- **Docu**
 - It is now possible to switch to another object type after working with objects in the Object List panel.
 - The icons of the Java Source and Java Class object types are no longer mixed up.
 - Fixed the layout of the UI elements of the Object List panel when the window is resized.
 - Changed negative values in Quotas to “Unlimited”.
- **Code Analyzer Options**
 - Analysis results on the Structure View tab now show correct line numbers, not zero values. The issue occurred in trial mode only.
- **Docu Manager**
 - Custom sorting of documents is now restored at the next application launch.
