

Release Notes

ClearSQL 7.0.4 (build 383)

IMPROVEMENTS

- **Project Report Assistant**
 - The tabs “New Report”, “Templates”, and “Generation Log” are no longer hidden when no project is loaded to the GUI.
 - Renamed commands on the Report History pop-up menu.

BUGS FIXED

- **Code Analyzer**
 - Wrapped code is now ignored by the parser and no longer raises a parser error.
 - The DEFAULT keyword used as a parameter of the RESTRICT_REFERENCES pragma no longer causes a parser error.
 - The CURRENT keyword used as a parameter name no longer causes a parser error.
- **DB Connection Window**
 - Oracle Net Service Names are now retrieved correctly from the OpenLDAP server.
- **Structure View**
 - Content on the Structure View tab no longer disappears after collapsing the nodes.
- **Code Review Rules**
 - Fixed the default selection of rules on the Code Review Options page.
