

Release Notes

SQLDetective 4.7.2 (build 247)

IMPROVEMENTS

- **Code Analyzer**
 - Object names are now always shown on the title bar of the Code Analyzer panel in the SQL Editor, Stored Program Editor, and Object Navigator.
 - SELECT statements including with_clause and plsql_declarations_clause are no longer ignored by the analyzer.
- **Preferences**
 - Moved the option “Consider empty line as a statement delimiter” to “Code Editors > SQL Editor”. Disabled by default.
 - Described all pages of Preferences in Online Help.

BUGS FIXED

- **Compare Databases, Schemas, Objects**
 - The NOT NULL attribute of a Migration SQL/Synchronization script is now included in the comparison.
 - Synonyms are no longer lost for compared objects.
 - Owner names are no longer lost in compared package bodies.
 - The error “Operation aborted” no longer occurs on reconnecting to a database during comparison.
- **Object Navigator**
 - The object tree now refreshes automatically after new objects are created.
 - Object Navigator now shows correct information for descending nodes.
 - After restarting the application, all pop-up menu commands are now available in the ContentSelector.
 - Fixed objects counting.
- **SQL Editor**
 - The error message “Invalid pointer operation” no longer occurs on clicking the “Toggle HTML output” button on the HTML Output tab.
- **Stored Program Editor**
 - It is now possible to add the Preferences button to the toolbar of the Stored Program Editor.
- **Database Examiner**
 - An access violation no longer occurs on clicking “Refresh data”.
- **Extract DDL**
 - “Extract DDL” and “Generate Scripts for Create/Drop” are no longer available for Package Functions and Package Procedures.
- **Group Actions**
 - The error “Unexpected action Execute on object type <ObjectName>” no longer occurs on trying to execute several stored programs at a time.
- **Code Analyzer Options**
 - The “Show header” option now works correctly for CRUD matrices.
- **Job Wizard**

June 28, 2018

- Added autofit and sorting options to the column headers and updated the pop-up menu with options from the toolbar.
- **Online Support Desk**
 - The values in the “Country” and “Company” fields are no longer mixed up in the preview mode.
