About LAO—PDR

- DHIS2 is managed and led by DPIC, MoH, with coordinated support by many DPs WHO, WB, UNFPA, KOICA, KOIH, Lux-Dev, UNICEF and UiO.
- The health sector reform strategy sets the goal to reach UHC by 2025.
- DHIS2 is a data warehouse and has reporting tools for many health programs.

Process

- 25 indicators are selected from the national core indicators and WHO list of UHC indicators.
- Engagement with MoH and consultation with related department and DP on data sources and key message.
- Use of DHIS2 for data visualization and data triangulation.

Three aspects of UHC

- **Who** is covered?
- **What services** are covered?
- **What proportion of the cost** is covered?

100% of the population with insurance that covers only a few services, and charging high co-payments is **NOT** universal health coverage!
