Supporting Sustainable Sanitation Improvements Program (3Si)

About 3Si Information System

- An initiative by PSI India.
- Objective: to build an Information System for easy management of data.
- Project: toilet construction in households of Bihar.
- 3Si helps PSI to track and manage the progress of constructing toilets in households.

Key features

- Allows the field users to enter data for beneficiaries.
- Track the progress in toilet construction.
- Track the quality of the toilets constructed.
- State project officers analyse the data, manage the delays or quality issues and generate custom reports.
- Reports app generates longitudinal record for each beneficiary.
- Import app imports the event or tracker data.
- Legacy data imported from January 2013 to June 2016.
- Live data reported since July 2016 with web and Android platforms.
