THE CORK WOMEN'S HEALTH GROUP

As a result of the meeting on Contraception in Connolly Hall in February a campaign was launched to impress upon the Minster for Health that there is a need for a comprehensive family planning service throughout the country. A number of demands were formulated to be sent to the Minister of Health. These are that the Minister in his proposed legislation on contraception, sets up:-

I) A fully comprehensive contraceptive service administered through the Health Centres.

2) Items and services to be free to medical card holders.

3) Information and publicity should be openly available.

4) The service should be a safe service hence medical personnel should be specifically trained, clients health monitored, drugs and methods subjected to research.

5) Female and male sterilisation should be easily available.

We are now working on petitioning and public meeting s in different areas. Groups or individuals interested in organising activities for the contraception campaign in their own areas should contact us, the Women's Health Group 24 Sullivan's Quay Cork 02I/ 967660 or come to our meetings on Thursday nights at 8.00pm. in the Quay Co-op.
