

Product Introduction

Corti is an intelligent partner that helps emergency medical dispatchers make life-saving decisions.

Faster, more reliable diagnoses when it's most critical.

Corti identifies important patterns in each conversation and alerts dispatchers of urgent instances with a high level of speed and accuracy. In the case of out-of-hospital cardiac arrest (OHCA), Corti can reduce the number of undetected OHCA's with more than 50%.

Orb

A light in the dark.

Corti Orb is the device that compliments Corti's software and can get you started quickly. Corti Orb sits on the dispatcher's desk and connects to the telephone's audio stream to listen in on emergency calls. As voice data gets processed on Corti's platform, the Orb sends appropriate prompts and alerts to the dispatcher's screen.

Triage

Smart in-call diagnostic assistance.

Triage assists dispatchers through the triaging flow and helps them to improve performance and reduce mistakes. Triage can support any protocol and visualizes content in a smart and intuitive way. Dispatchers are assisted through the questioning and gathering of important information, making them more agile and efficient.

Review

Intelligent quality assurance management.

Review provides overview and insights to improve quality and transparency for all upcoming calls. Review organizes emergency call data in a meaningful way and saves it for quality improvement. Each call or selected groups of calls can reveal helpful insights that provide overview and training opportunities.
